The role of Cyclope Enterprise Printer Monitor

Alistair Nayar, ACN Consultants, described the role of Cyclope Enterprise Printer Monitor to record printing costs. It is an eye opener to see how much printing is actually done in a short time.

"We had installed a Canon Imagerunner on our network, and found that it had a reduced capability to record print counts - just copies and faxes.

"In terms of cost recovery, the product easily paid for itself in one month. Simple and low cost is all you can ask for "

"Cyclope Enterprise Printer Monitor is simple to install, with no problems at all. Good documentation in the pdf file available on the web site. Very intuitive and logical user interface."
