CYCLOPE

## Have you ever thought what results would your company generate if each employee were more productive with at least one idea?

If you have ever been unsatisfied with simply looking for a method to enhance the activity of your employees, we think you would like us to present you something that we find ...

### ... the ideal choice for monitoring and enhancing the productivity of the employees

It is about Cyclope, a software application which monitors the computer activity of the employees and offers a wide range of information supporting the analysis and increasing their productivity.

## Cyclope is a non-invasive employee surveillance solution for employees working on a computer

Cyclope does not monitor any details related to the content (screenshots, text) of visited web pages, documents or chat windows your employees use.

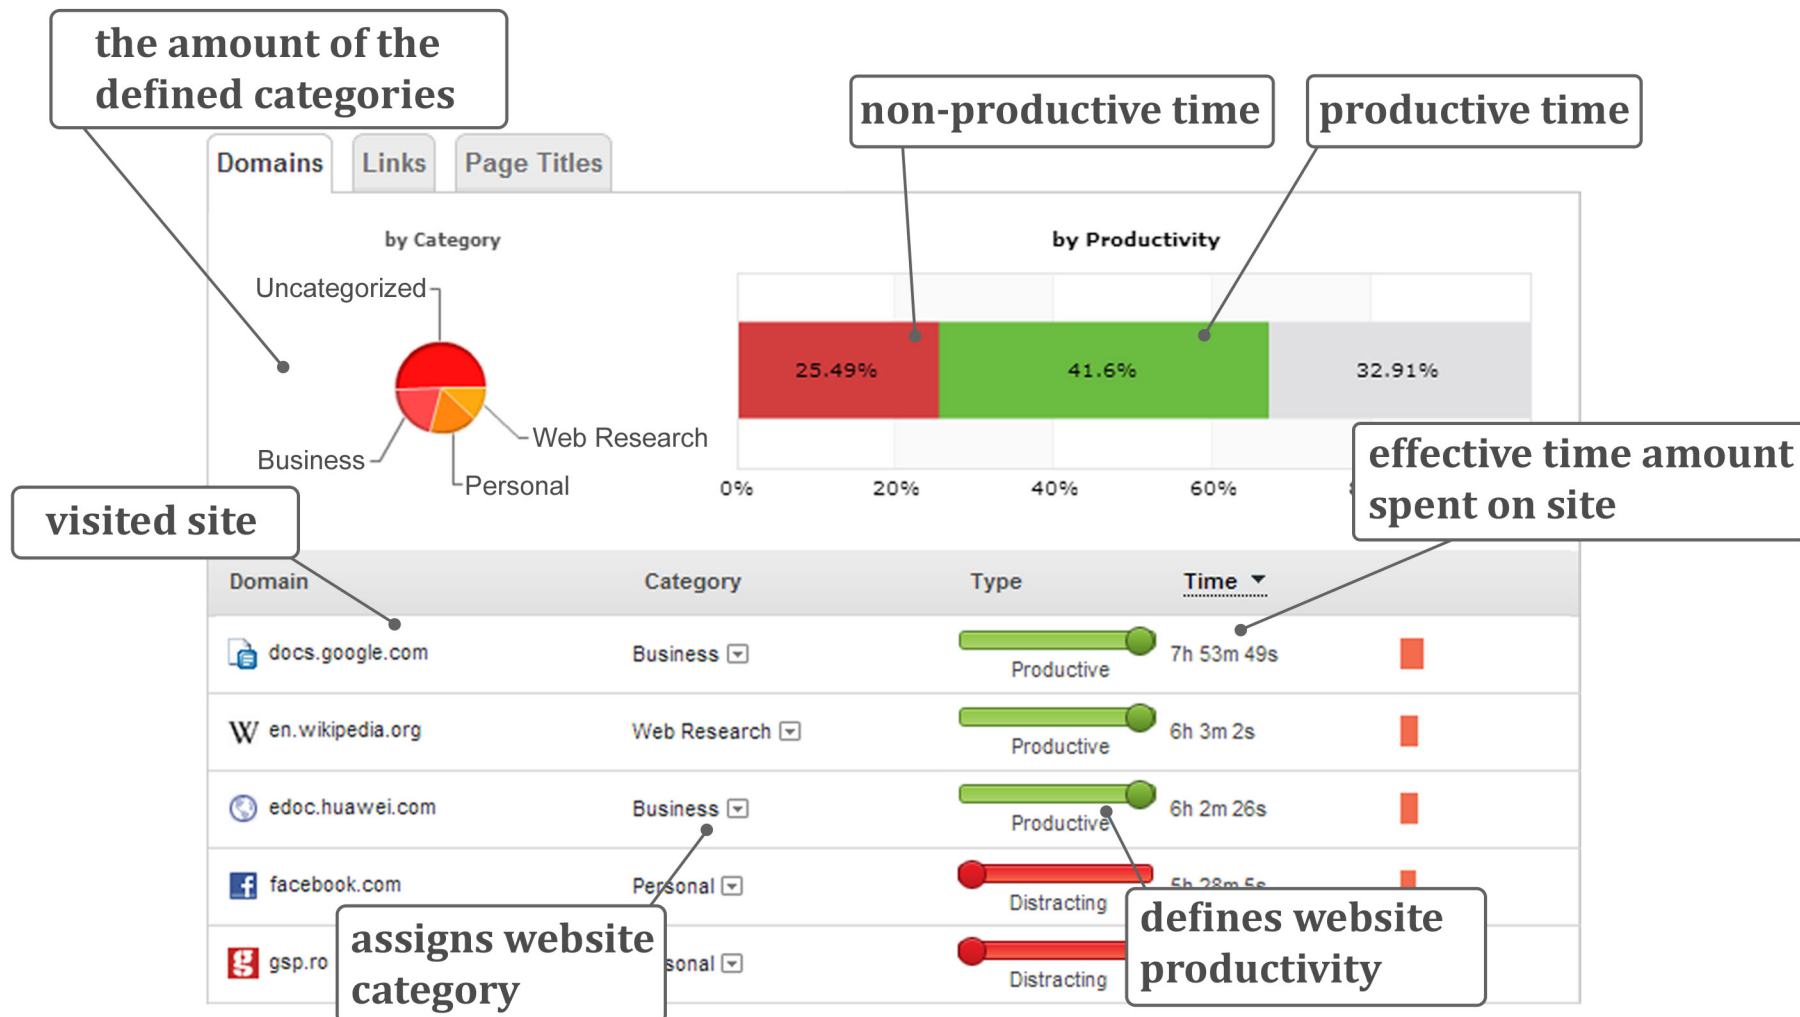

Cyclope is used by

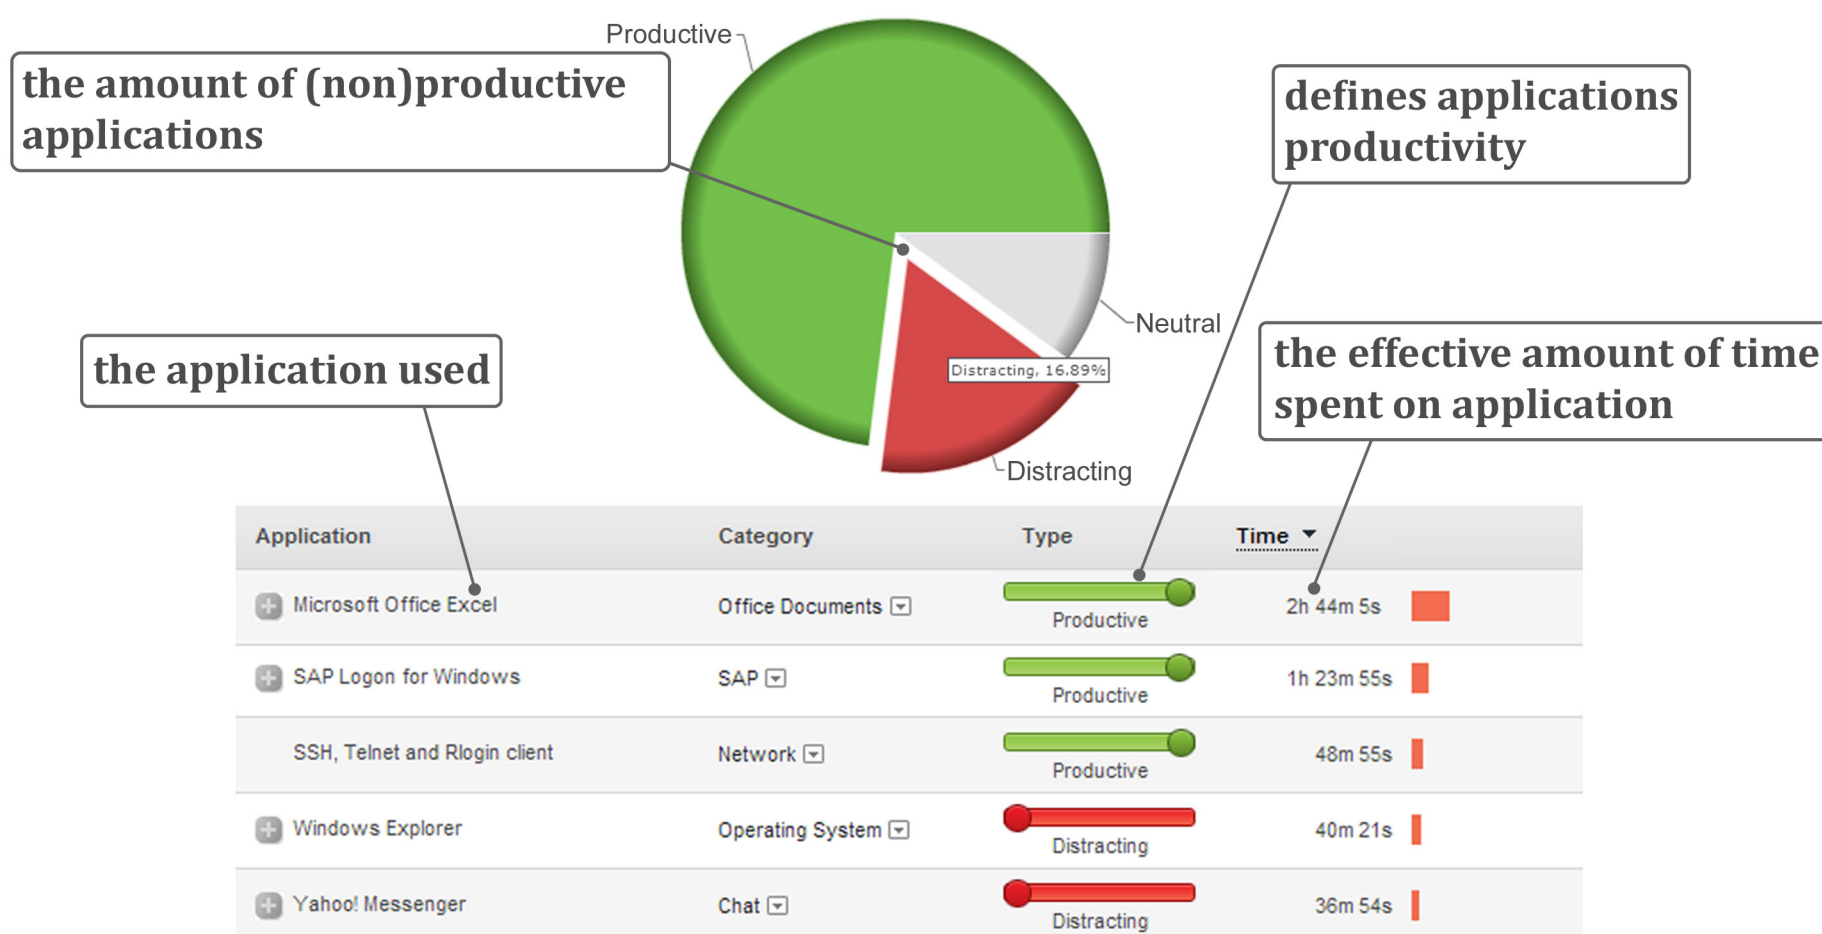

**1500** public companies and institutions  
in 19 countries worldwide

# Cyclope functionalities

## 1. Activity report on the Internet

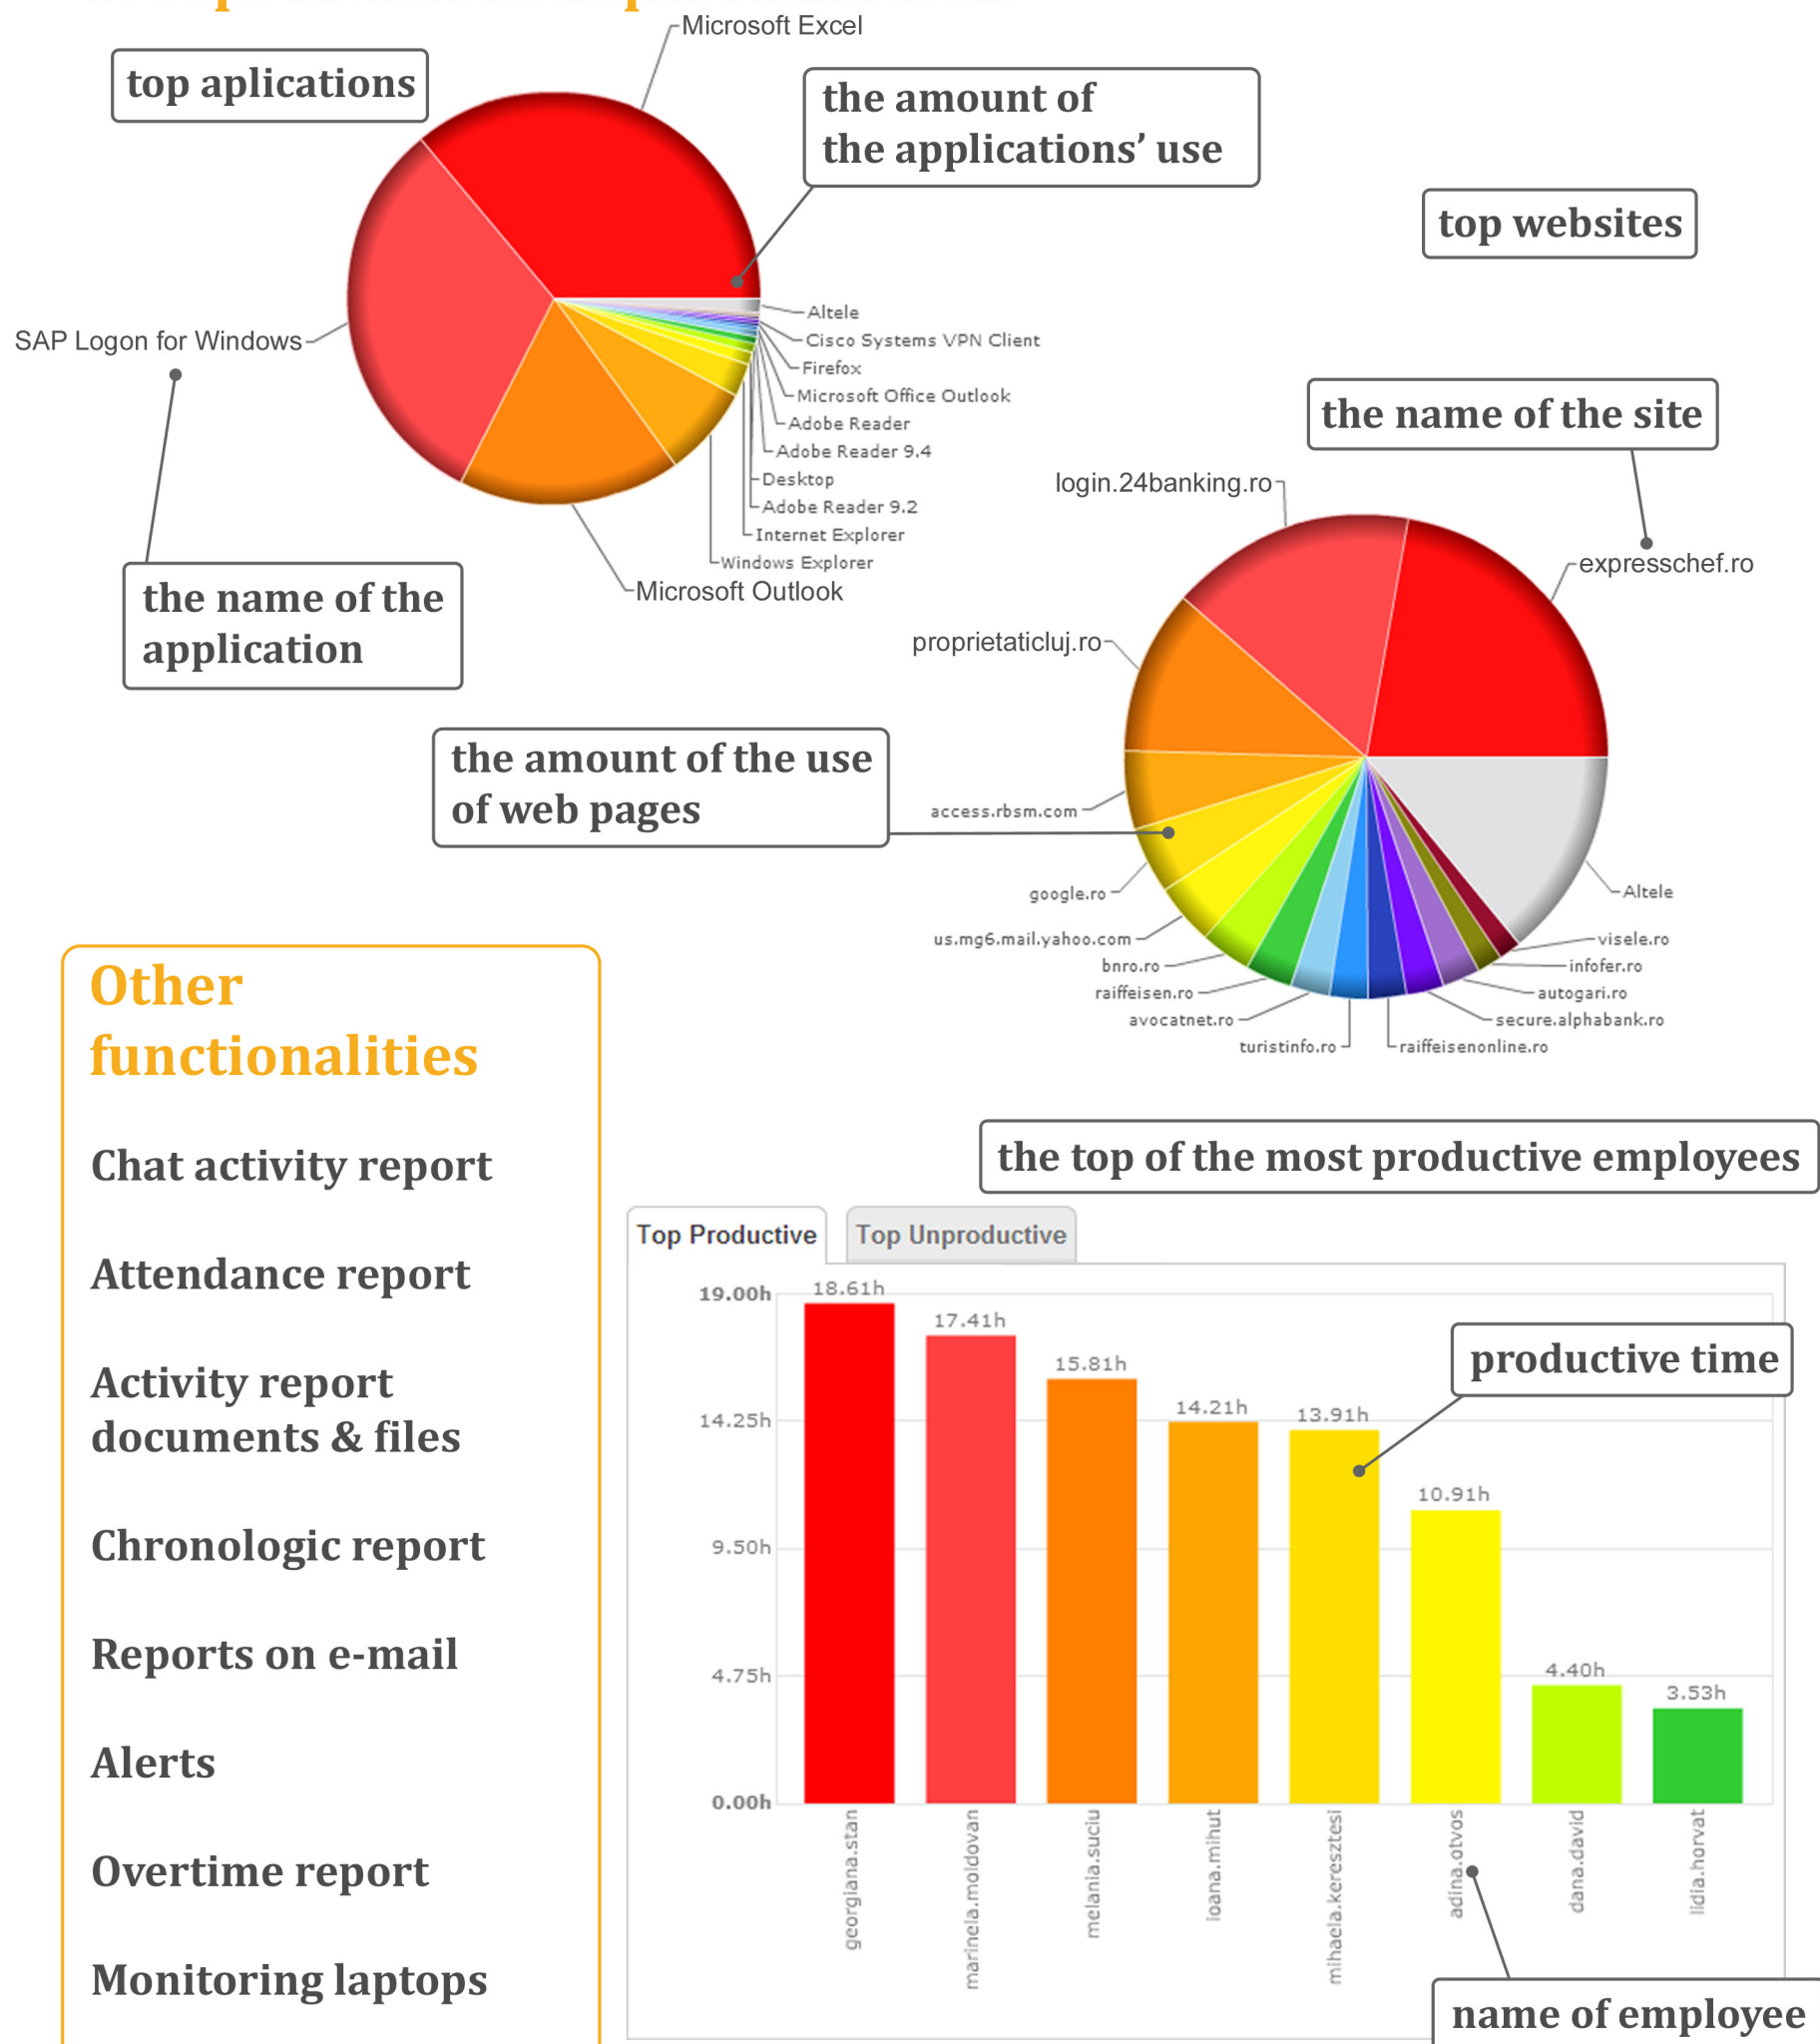

## 2. Productivity Report

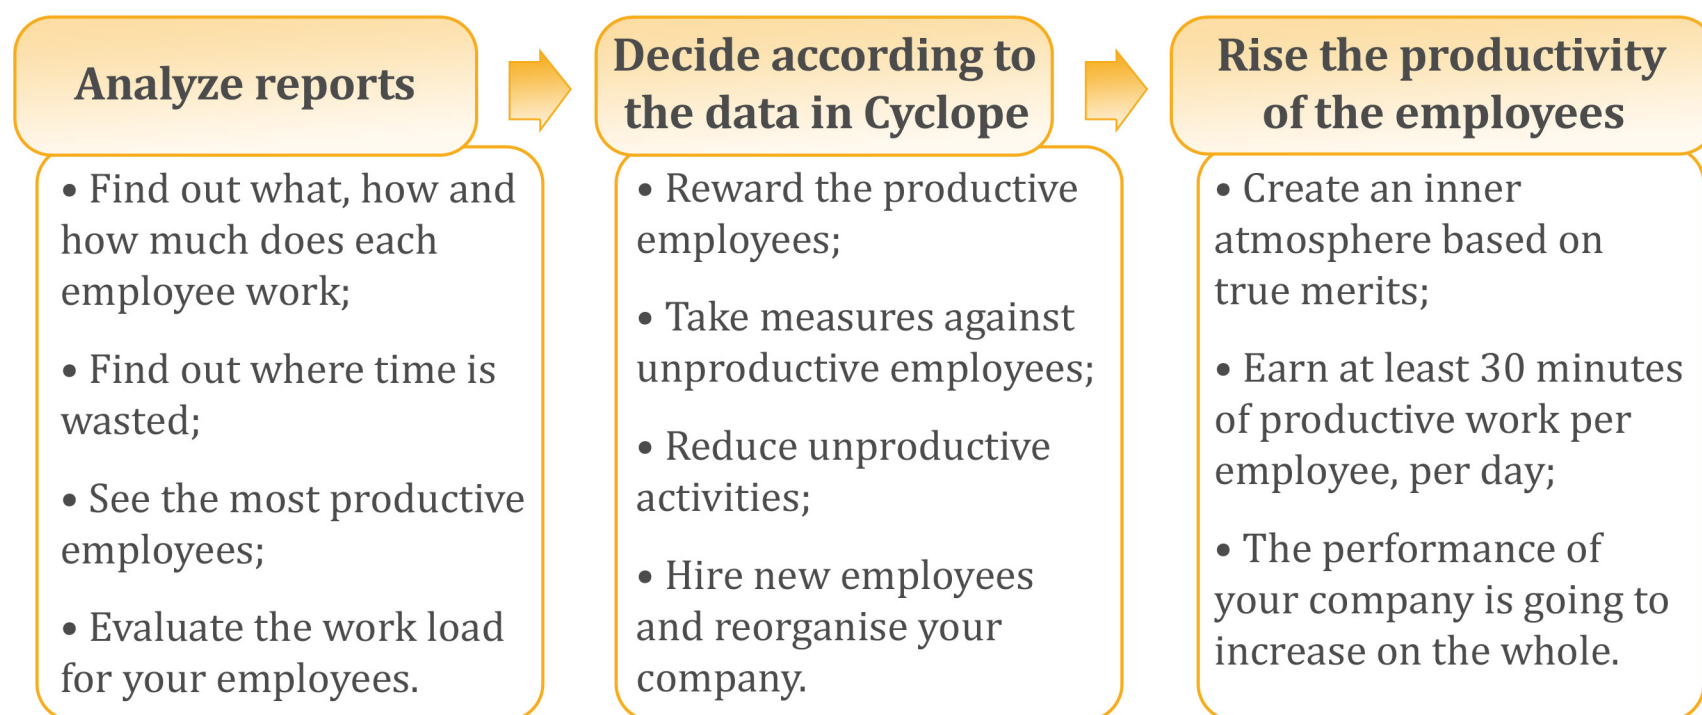

# Cyclope functionalities

## 3. Tops at firm or department level

# Benefits of Cyclope

IT people are going to appreciate the fact that Cyclope **does not overload the net** and that **it works invisibly**.

**You can test Cyclope free of charge for 15 days on maximum 30 computers.**

## ROI calculator for using Cyclope

The Cyclope Clients have registered a 60-minute increase of productivity per day, for each employee.

What does **one extra hour per day** mean for each employee?

2.400 hours / year	10 employees	\$57,264 / year *
24.000 hours / year	100 employees	\$572,640 / year *

\* Reference point: average hourly wage for Canada, August 2013 = \$23.86

What would one extra hour per day mean for each employee in your company?

$$1\text{h} \times 240\text{ wd} \times \text{.....} \times \text{.....} = \text{.....?}$$

(no. of employees)                      (hourly wage)
