## 1. Start using Cyclope Employee Surveillance Solution

After logging in using the default login data (the default username and pass are **admin** and **admin**), the first page that the user can access is the Trial page, which is a slightly different version of the **Licensing** page:

Img. 01, Trial page

The user has two possibilities.

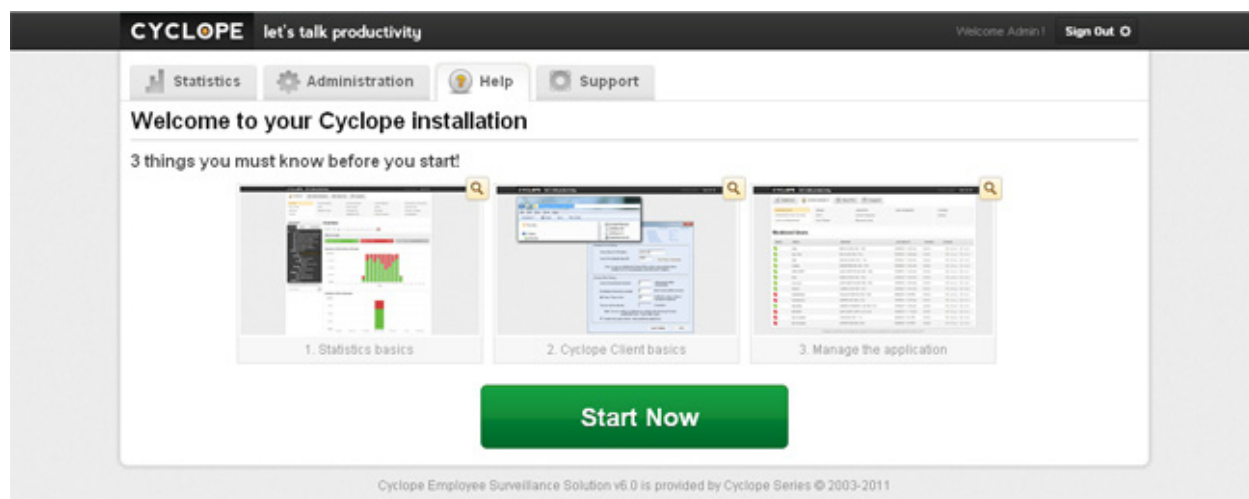

First one is to use the **Start Evaluation** button and request a free trial period to test the application.

*FOR COMPLETING THIS STEP YOU NEED TO HAVE A FUNCTIONAL INTERNET CONNECTION. HOWEVER, IF PROBLEMS ARISE (PROXY SERVER AUTHORIZATION, NETWORK DOMAIN AUTHORIZATION) PLEASE CONTACT THE CYCLOPE SUPPORT TEAM.*

The second option is to enter a valid **License Key** and unlock the entire application by clicking the **Activate License** button. In both cases, the following information must be filled: **Company**

**Name, Name, Email** and **Country**. The *Phone* field is not mandatory and the **Installation Key** field is already filled with a code that is uniquely generated for the computer used to host the Cyclope Server.

Just before starting the evaluation, the user has the possibility to briefly explore the main features of the application. This tour page is shown only once, when accessing the application for the first time and it can be skipped by pressing the **Start Now** button.

Img. 02, Tour page

When the evaluation period expires, the user can only access the **Licensing** page. This time, the Licensing page appears in its usual state, without displaying the **Start Evaluation** button. The user can unlock the application and continue using it by entering a valid license code in the **License Key** field.

## 2. Manage application settings

### 2.1 Monitored Users

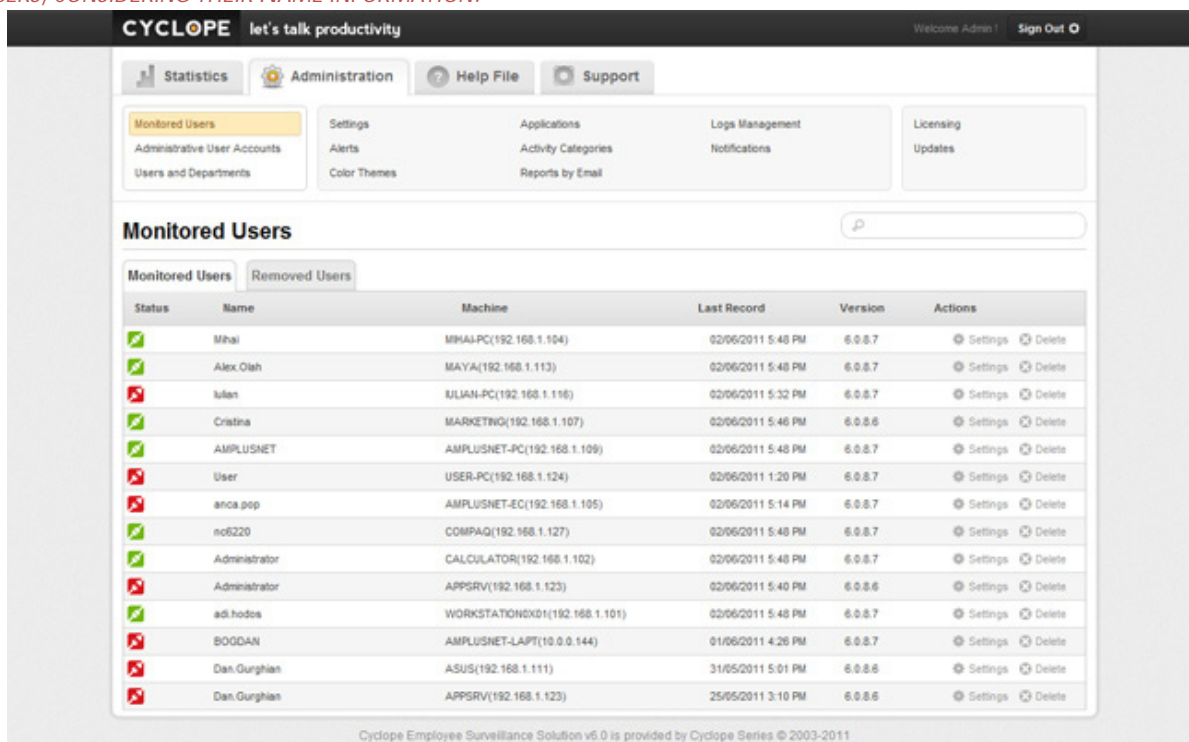

Information sections included in this page:

#### 2.1.1 Monitored Users

- **Data Table** containing the following information displayed on columns:
  - ü Status - An icon reflecting the monitoring status for each user. The **green state** means that the user is monitored and the **red state** of the icon means that the server has not received logs from the client for a period of time greater than the connectivity period set for that user multiplied by a factor of 6.
  - ü Name - The username used by the employee to log on his operating system.
  - ü Machine - The name of the computer used by the employee.
  - ü Last Record - The time and date of the last log received by the server from the client.
  - ü Version - The version of the Cyclope client application.
  - ü Actions - Links for viewing and modifying the current client settings, and for deleting the monitored user.

*When deleting a monitored user, you will be prompted if you would also like to uninstall the client application on the machine in cause.*

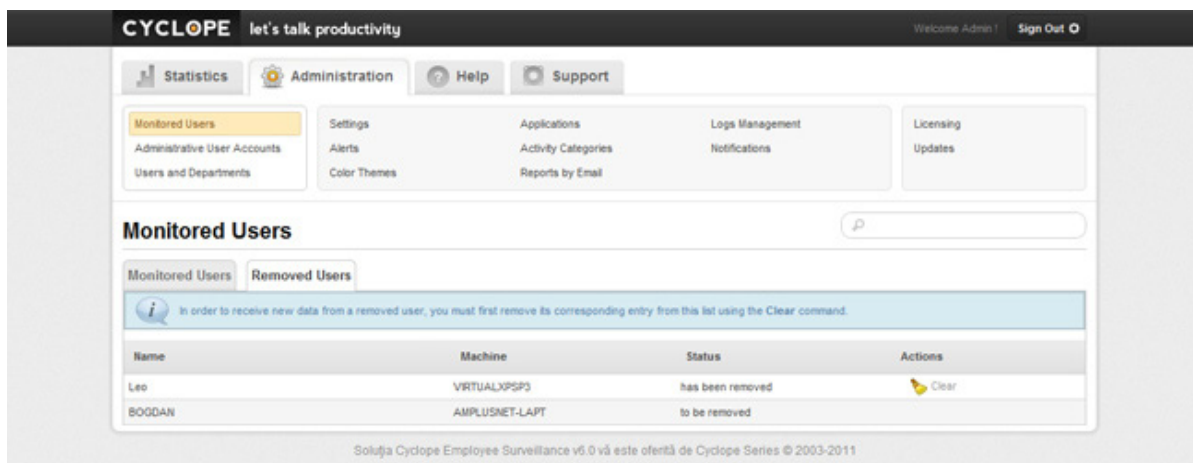

*A search box is included on top of the data table. The control searches as you type among all the listed users, considering their name information.*

Img. 03, Monitored Users page

### 2.1.2 Removed Users

- **Data Table** containing the following information displayed on columns:
  - ü Name - The username used by the employee to log on his operating system.
  - ü Machine - The name of the computer used by the employee.
  - ü Status - There are two possible values: *to be removed* for the employees that have been deleted and the action is not complete because the client application on that station wasn't restarted and *has been removed* if the deletion action has been completed.
  - ü Actions - The *Clear* action link appears only for the deleted users and serves in erasing the deleted employee from this list. After performing this action the client will start sending data to the server again, after restarting the client application and if the deletion of the employee was not followed by uninstalling the client application.

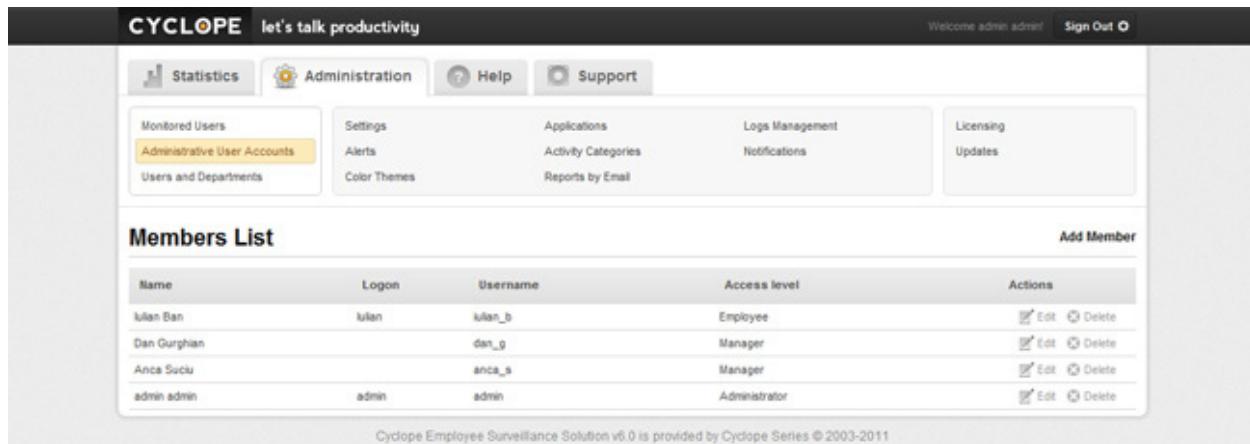

Img. 04, Monitored Users page, Removed Users

## 2.2 Administrative Users Accounts

### Information sections included in this page:

- **Data Table** containing the following information displayed on columns:
  - ü Name - The first and last names specified for the account.
  - ü Logon - The windows username (appears if the member's access level is set to Employee)
  - ü Username - The name specified for the administrative account.
  - ü Access Level - The access level set for the account.
  - ü Actions - Links for editing or deleting the administrative account.

Img. 05, Administrative User Accounts page

## 2.3 Add Member

This page allows creating a new member account or editing an existing one. The user has the following options:

- **Active** checkbox, used for deactivating the account rather than deleting it and permanently losing the information.
- **Alias** checkbox. If checked, the Employee appears on the interface under the first name and last name specified here, rather than his Windows username, or the Logon.  
*NOTE: THE ALIAS CHECKBOX CAN BE SET ONLY FOR THE MEMBER ACCOUNTS HAVING ACCESS LEVEL OF TYPE EMPLOYEE.*
- **First name.** The user can specify a first name for the administrative account.
- **Last name.** The user can specify a last name for the administrative account.
- **Username.** The name of the administrative account.
- **Password.** The password for the administrative account. The strength of the password can also be measured as you type.
- **Re-type Password.** Check the password by retyping it in this field.
- **Access Level.** The options for this field are: *Administrator*, *Manager*, *Limited Manager* and *Employee*. The Administrator account has absolute privileges, while the Manager can only view one or more departments' statistics and his access to the Administration area is limited. The Limited Manager account can only access the Statistics area and has no access to the Administration pages. The Employee account can only view one employee's statistics.
- **Monitored User.** Holds the specification of the access range for the created account. When creating an Administrator account, this option is not visible as it is not necessary.
- **Email.** You can optionally specify an email address when creating an account.
- **Save button.** Hit Save in order to keep your changes and create the account.

Img. 06, Add Member page

## 2.4 Users and Departments Management

This page allows the management of the monitored users and departments.

- **Structure** box holds the tree structure of the entire monitored network.
- **Add New Group** button creates a new department.
- **Delete Group** button erases an existing department.
- **Expand all** button expands all the nodes in the treeview.
- **Collapse all** button collapses all the nodes in the treeview.

*NOTE: USE THE IN PAGE INSTRUCTIONS FOR CREATING AND DELETING DEPARTMENTS.*

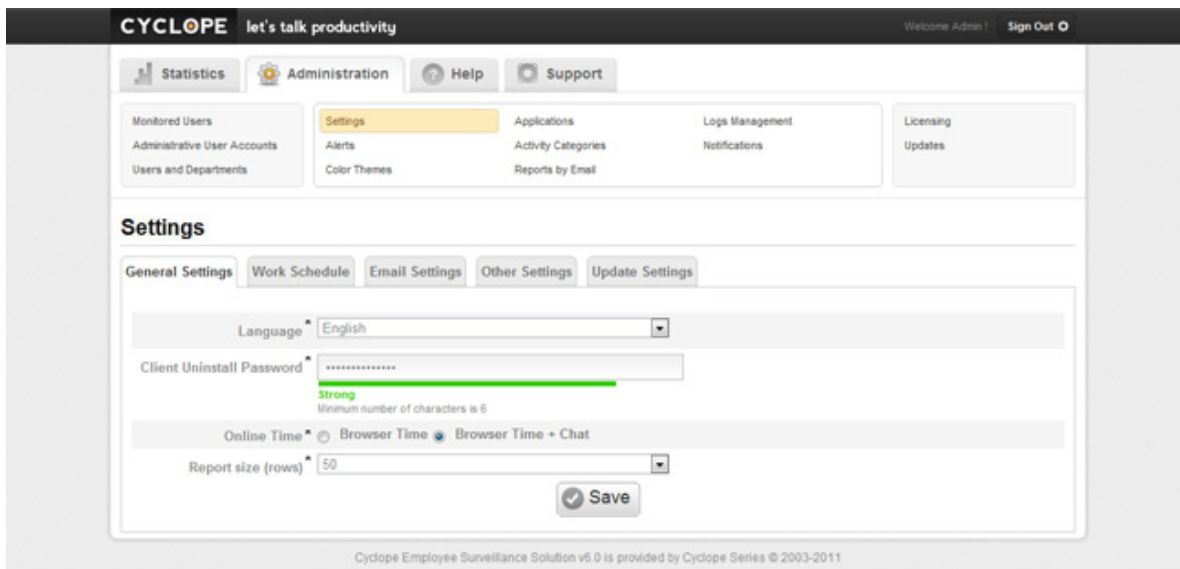

Img. 07, Users and Departments Management page

## 2.5 Settings

This page groups various application settings on several page tabs.

### 2.5.1 General Settings

- **Language.** This field offers predefined choices regarding the UI display language.
- **Client Uninstall Password.** This field holds the uninstall password for the Cyclope client application. The strength of the password can be verified as you type.
- **Online Time.** The administrator can decide whether online time also includes the time spent chatting, in addition to the browsing time.
- **Report Size (rows).** Select the size of the tables that are included on each statistics page of the interface. The PDF reports that can be exported are also affected by this value. The default value is 50.
- **Save button.** The Save button saves and applies the filled values.

Img. 08, Settings page, General Settings

## 2.5.2 Work Schedule

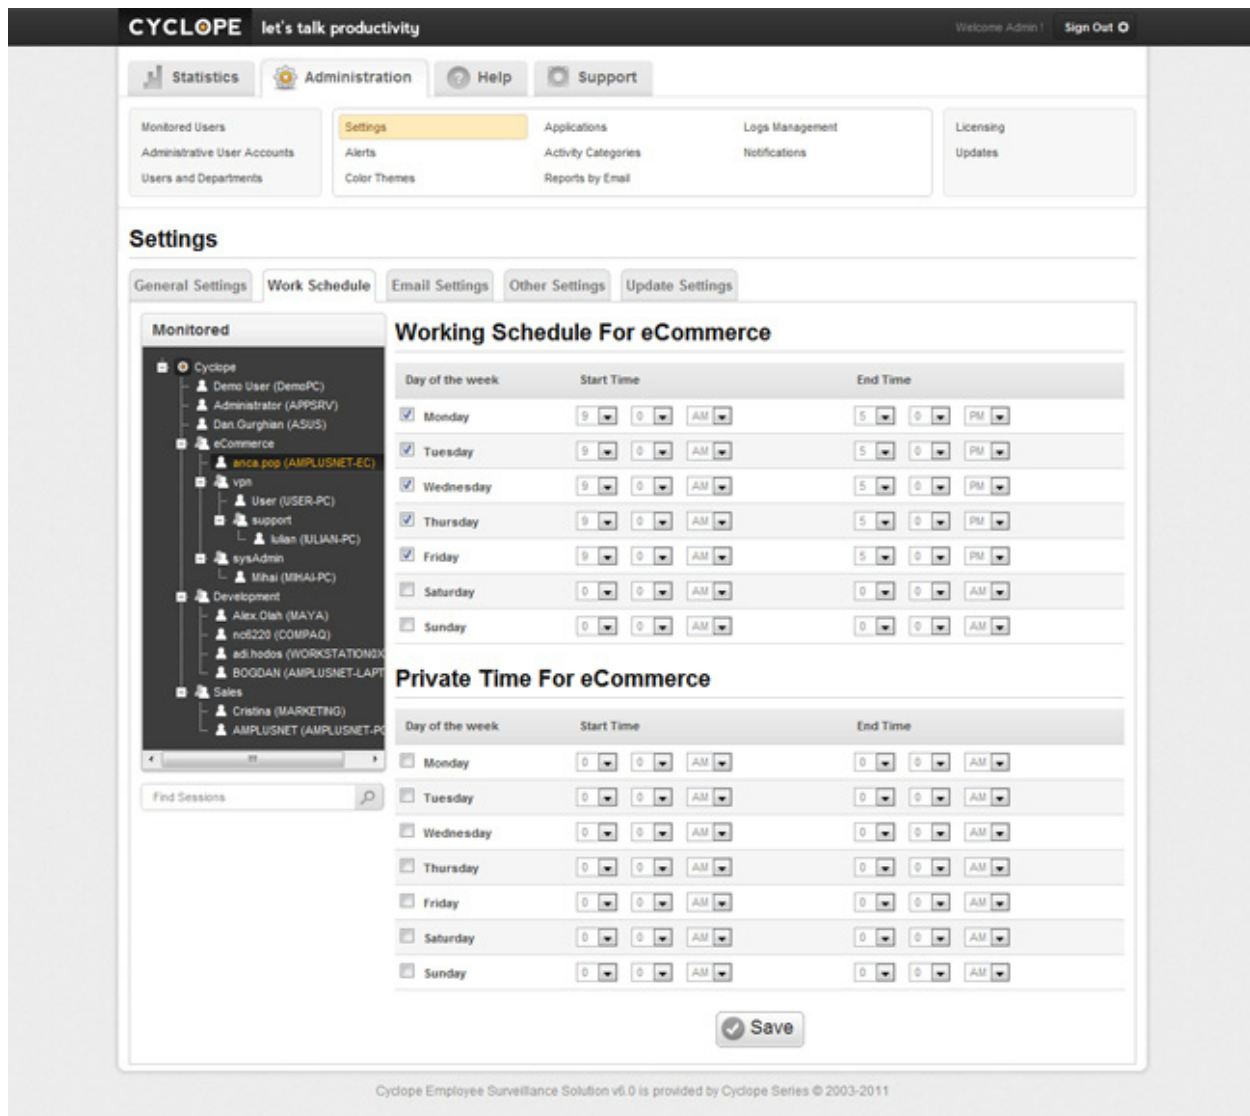

- This tab allows the definition of the **working schedule** for all the employees monitored with Cyclope. Use the checkboxes and the dropdown controls to create virtually any configuration for one week's duration.

*NOTE: YOU CAN SET THE WORKING SCHEDULE ON DEPARTMENT LEVEL ONLY.*

- **Private Time.** The private time, when defined, assures the employee's privacy by keeping his activity hidden for the specified time frame.

*NOTE: YOU CAN SET THE PRIVATE TIME ON DEPARTMENT LEVEL ONLY.*

- **Save button.** The Save button saves and applies the current configuration.

Img. 09, Settings page, Work Schedule

### 2.5.3 Email Settings

*IN ORDER TO USE THE EMAIL REPORTS FEATURE YOU MUST FIRST FILL THE EMAIL CONFIGURATION DATA.*

- **SMTP Server.** The name of the email server.
- **SMTP User.** The username used to access the email server.
- **Password.** The password associated with the specified user email account.
- **Port.** The port used for sending the email.
- **Save button.** The Save button saves the current settings.
- **Test Email button.** The Test Email button sends an email to the mail address used for registering Cyclope using the specified email settings. The administrator will be informed on this test's outcome.

*IF YOUR EMAIL SERVER DOES NOT REQUIRE AUTHENTICATION, MAKE SURE TO CHECK THE BOX NAMED SERVER DOES NOT REQUIRE AUTHORIZATION.*

The screenshot shows the CYCLOPE Administration interface. The top navigation bar includes 'Statistics', 'Administration' (selected), 'Help', and 'Support'. Below this, a sidebar lists 'Monitored Users', 'Administrative User Accounts', and 'Users and Departments'. The main content area is titled 'Settings' and contains several tabs: 'General Settings', 'Work Schedule', 'Email Settings' (selected), 'Other Settings', and 'Update Settings'. The 'Email Settings' tab is active, showing a checkbox for 'Server does not require authorisation' which is checked. Below this are input fields for 'SMTP Server' (mail.amplusnet.com), 'SMTP User' (alex.olah@amplusnet.com), 'Password' (masked with asterisks), and 'Port' (25). At the bottom of the form are 'Save' and 'Test Email' buttons. A footer note states: 'Cyclope Employee Surveillance Solution v6.0 is provided by Cyclope Series © 2003-2011'.

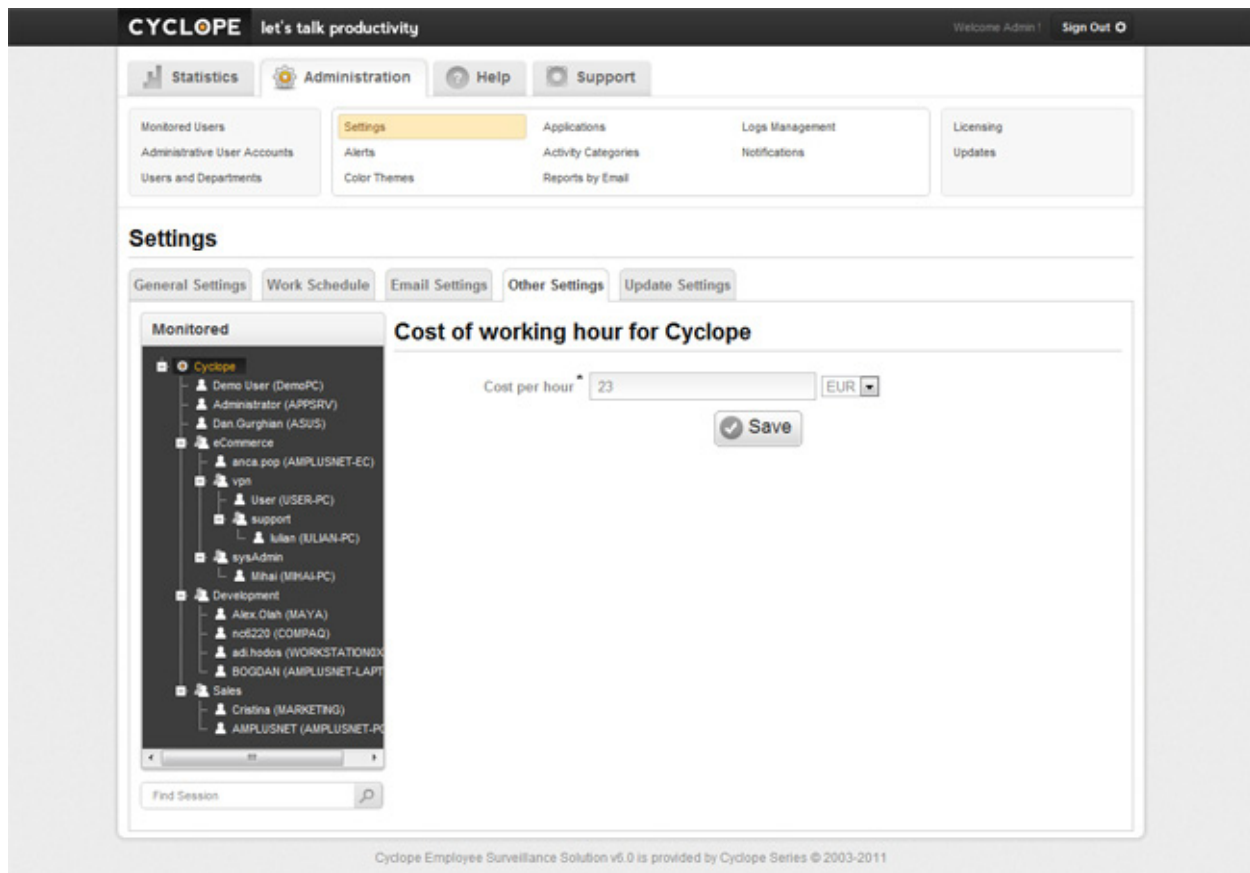

Img. 10, Settings page, Email Settings

### 2.5.4 Other Settings

- **Cost per hour.** How much your employee's work value. Specify an amount and choose a currency.

*NOTE: YOU CAN SET THE WORKING SCHEDULE ON DEPARTMENT LEVEL ONLY.*

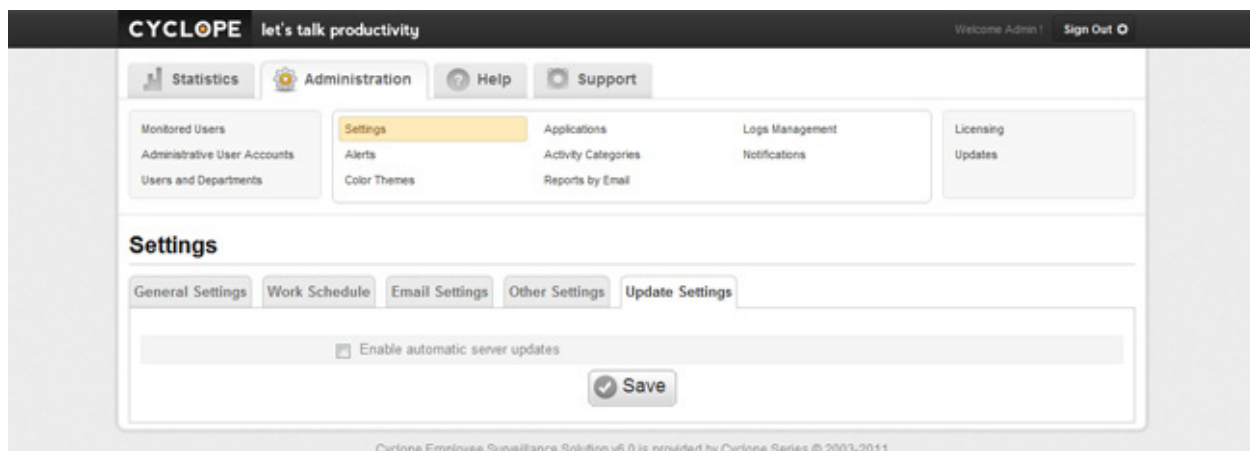

- **Save button.** The Save button saves the current configuration.

Img. 11, Settings page, Other Settings

### 2.5.5 Update Settings

- By checking the "Enable automatic server updates" checkbox, the server application will update itself to the latest version available.
- Save button. The **Save** button saves the current configuration.

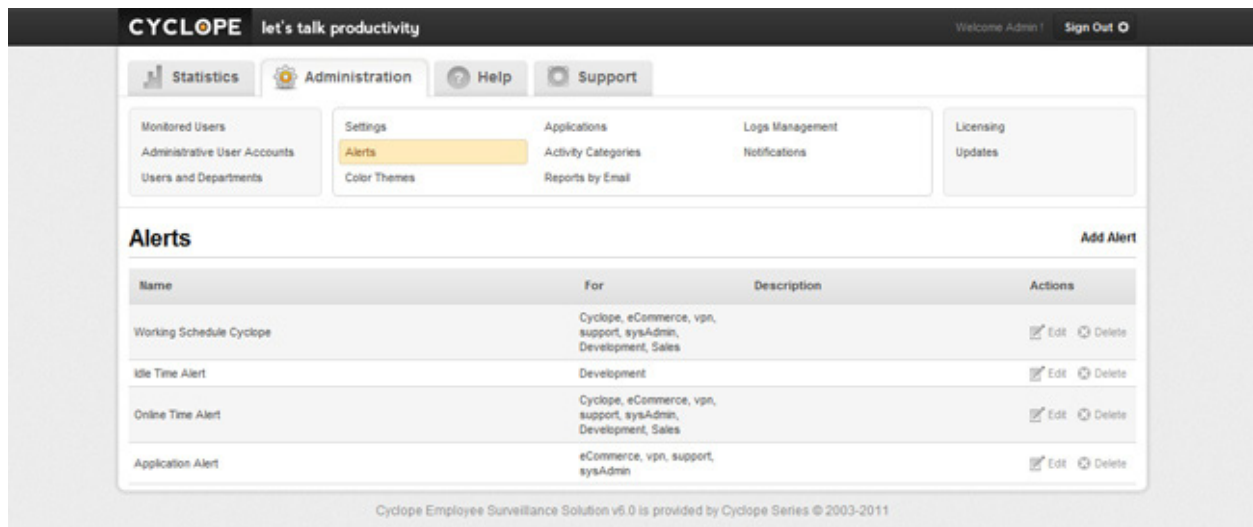

Img. 12, Settings page, Update Settings

## 2.6 Alerts

Information sections included in this page:

- **Data Table** containing the following information displayed on columns:
  - ü Name - The name of the defined alert.
  - ü For - The list of departments where this alert will apply.
  - ü Description - The description of the alert (this field is optional).
  - ü Actions - Links for editing or deleting each alert.

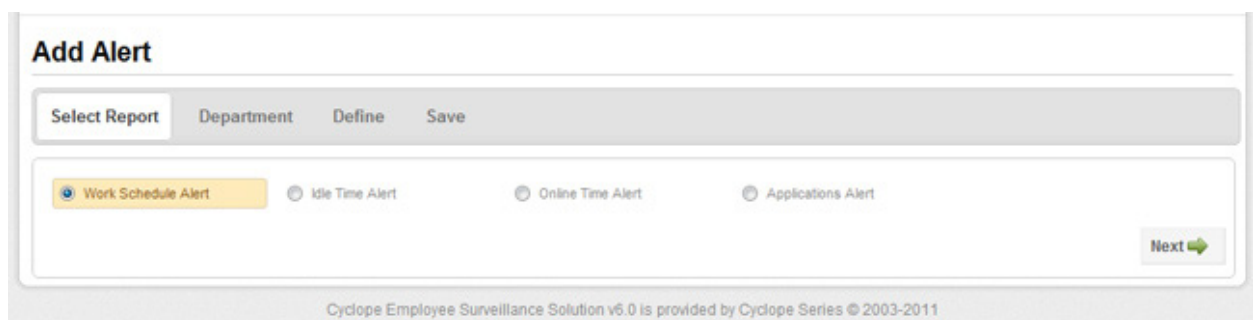

Img. 12, Alerts page

## 2.7 Add Alert

If you choose to add a new alert or edit one of the existing alerts, you are taken to this page. There are several steps required by the in-page wizard:

- **Select Report.** Specify the type of the alert. You can choose from: **Work Schedule Alert**, **Idle Time Alert**, **Online Time Alert** and **Applications Alert**.

Img. 13, Add Alert page

- **Department.** Select the department(s) you wish this alert to apply on.

The screenshot shows the 'Add Alert' page with the 'Department' tab selected. A tree view on the left shows the hierarchy: Cyclope > Development > Div1 (checked) > Support > Marketing. At the bottom right are 'Previous' and 'Next' buttons. The footer text reads: 'Cyclope Employee Surveillance Solution v6.0 is provided by Cyclope Series © 2003-2011'.

Img. 14, Add Alert page

- **Define.** Specify the rule of the alert. In this case, you can set a new configuration for the working schedule and the alert will be triggered if the employee's activity start time and end time will differ from your settings.

The screenshot shows the 'Add Alert' page with the 'Define' tab selected. The title is 'Working Schedule Div1'. Below is a table for setting the working schedule for each day of the week. The table has three columns: 'Day of the week', 'Start Time', and 'End Time'. The 'Start Time' column has dropdowns for hours (9, 0), minutes (0), and AM/PM. The 'End Time' column has dropdowns for hours (5, 0), minutes (0), and PM/AM. The 'Day of the week' column has checkboxes for each day. The 'Previous' and 'Next' buttons are at the bottom right. The footer text reads: 'Cyclope Employee Surveillance Solution v6.0 is provided by Cyclope Series © 2003-2011'.

Day of the week	Start Time	End Time
<input checked="" type="checkbox"/> Monday	9 0 AM	5 0 PM
<input checked="" type="checkbox"/> Tuesday	9 0 AM	5 0 PM
<input checked="" type="checkbox"/> Wednesday	9 0 AM	5 0 PM
<input checked="" type="checkbox"/> Thursday	9 0 AM	5 0 PM
<input checked="" type="checkbox"/> Friday	9 0 AM	5 0 PM
<input type="checkbox"/> Saturday	0 0 AM	0 0 AM
<input type="checkbox"/> Sunday	0 0 AM	0 0 AM

Img. 15, Add Alert page

- **Save.** This is the last step of the wizard. In order to save the alert, you must first specify a name and then press Finish. You can also specify a small description, but this is only optional.

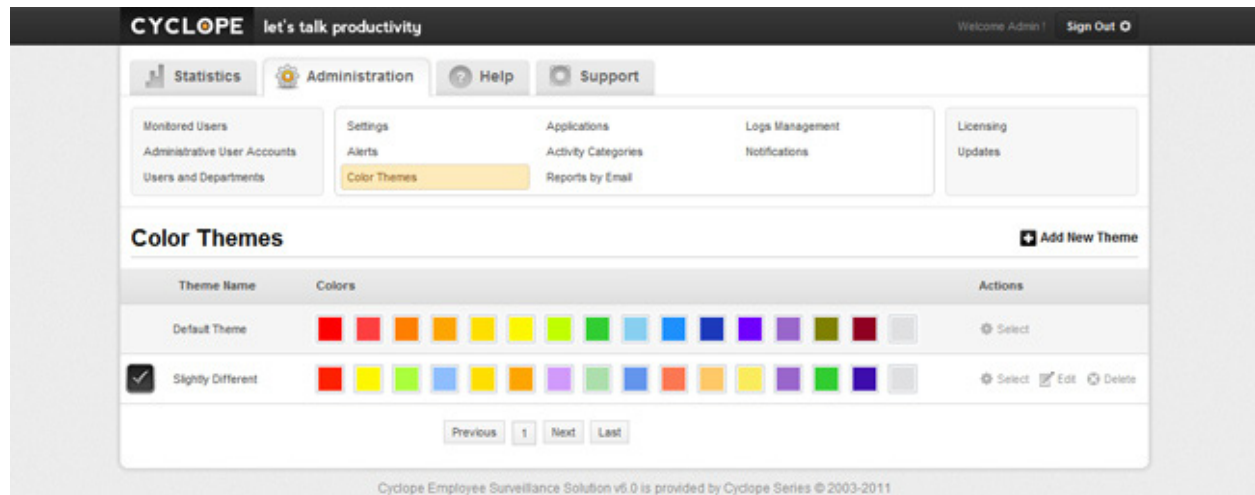

Img. 16, Add Alert page

## 2.8 Color Themes

**Cyclope gives you now the possibility to customize your interface. Choose an existing color theme or create your own style for the Cyclope charts.**

- The **Color Themes List** displays the defined color themes:
  - ü A tick icon indicating the currently active color theme.
  - ü Theme Name - The name of the color theme.
  - ü Colors - On this column you can see the actual composition of each color set. Usually there are 15 colors plus one neutral color used for the representation of grouped applications (e.g. Others).
  - ü Actions - Links for selecting and applying a theme, and for editing or deleting a defined color theme.

*YOU ARE NOT ALLOWED TO DELETE OR EDIT THE DEFAULT COLOR THEME.*

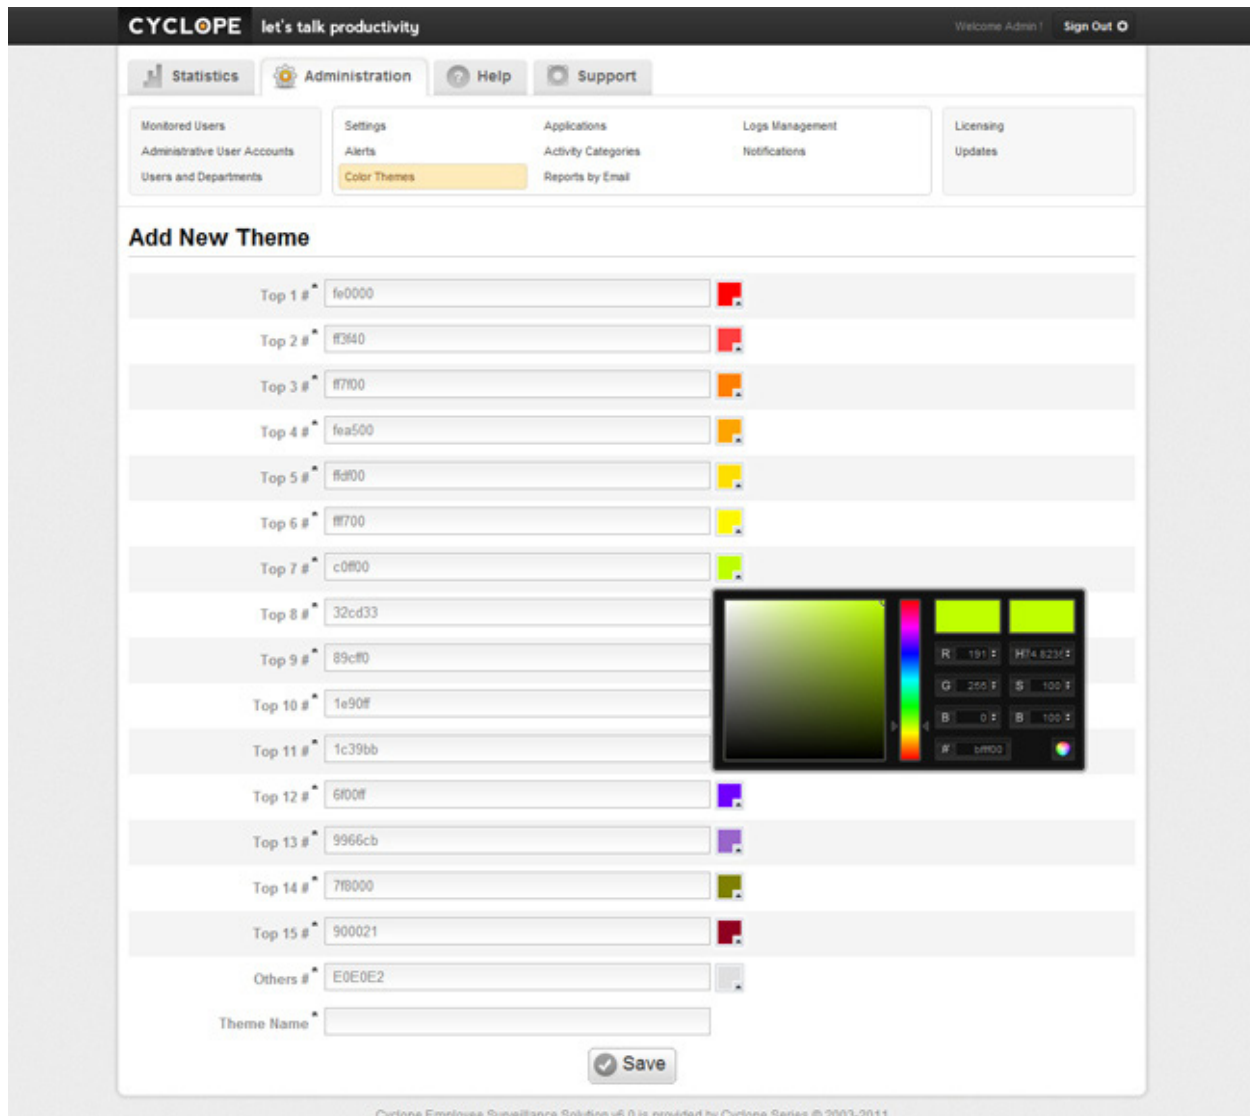

Img. 17, Color Themes page

## 2.9 Add New Theme

If you choose to add a new color theme or edit one of the existing color themes, you are taken to this page.

- Each color must be defined by specifying a valid **hexadecimal color code**. If you don't have one prepared, just use the built-in **Color Picker**.
- **Theme Name**. Specify a name for the new color theme by which you will identify it in the list.
- **Save** button. Hit Save in order to keep your changes and create the new color theme.

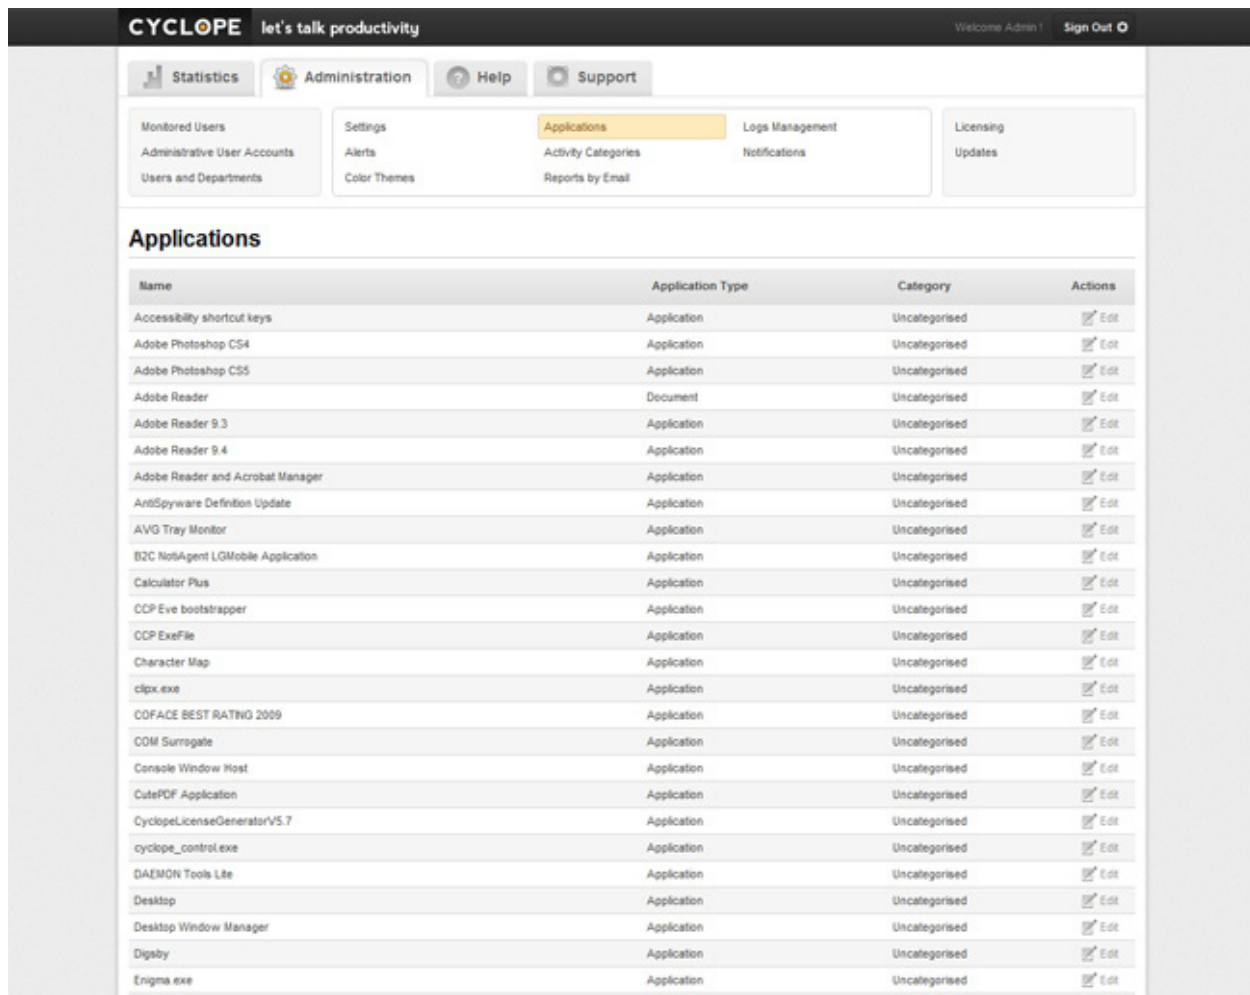

Img. 18, Add New Theme page

## 2.10 Applications

### Information sections included in this page:

- **Data Table** containing the following information displayed on columns:
  - ü Name - The name of the recorded application.
  - ü Application Type - The type of each application, as seen by Cyclope.
  - ü Category - To each application can be assigned a category from the existing ones. If no assignment has been made, this column will indicate *Uncategorized*.
  - ü Actions - Link for editing each application.

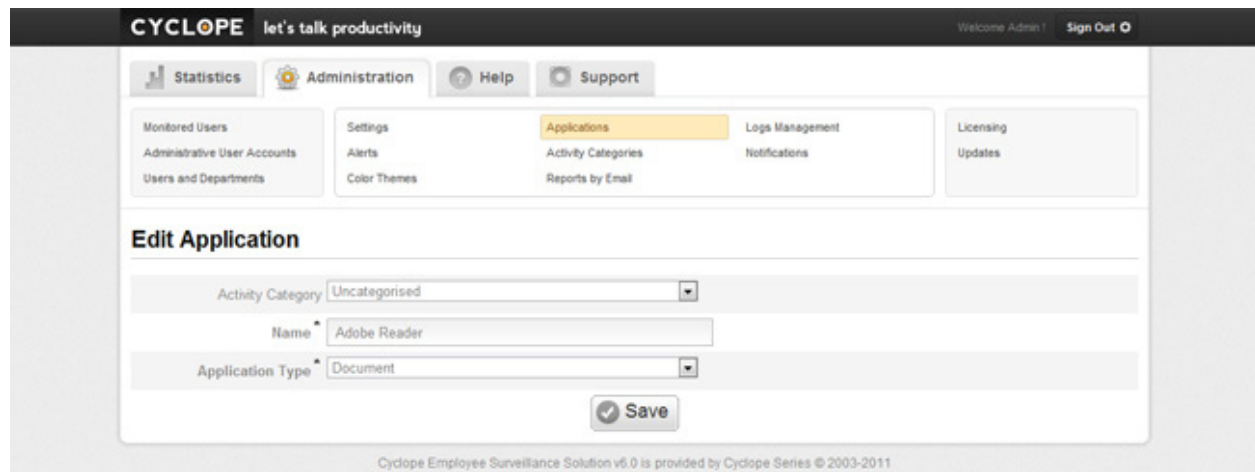

Img. 19, Applications page

## 2.11 Edit Application

If you choose to edit one of the recorded applications, you are taken to this page.

- **Activity Category.** Assign a category to the selected application from the defined category list.
- **Name.** Cyclope allows you to edit the name of any recorded application, in order to see it under a custom name throughout the user interface.
- **Application Type.** A very useful feature is the possibility to change the application type, or how Cyclope sees the application. You can choose from the following values: **Application** (which is the default for most of the recorded applications), **Chat**, **Document** and **Browser**.
- **Save button.** Hit Save in order to keep your changes.

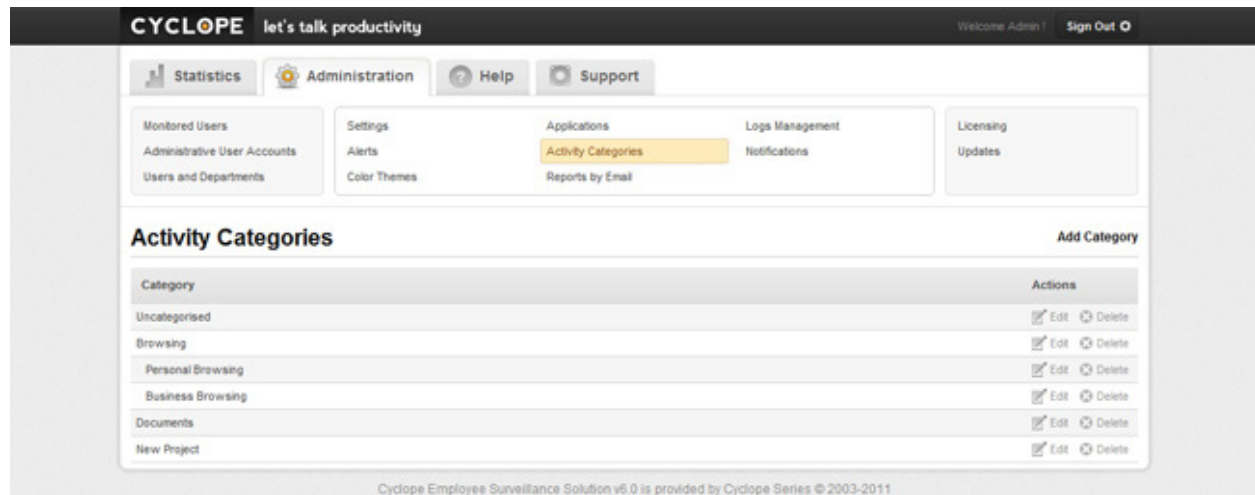

Img. 20, Edit Application page

## 2.12 Activity Categories

Information sections included in this page:

- **Data Table** containing the following information displayed on columns:
  - ü Category - The name of the category.
  - ü Actions - Links for editing or deleting each activity category.

*THE ACTIVITY CATEGORIES THAT HAVE A DEFINED PARENT ARE HIGHLIGHTED BY A SMALL INDENTATION.*

Img. 21, Activity Categories page

## 2.13 Add Activity Category

If you choose to add a new Activity Category or edit one of the existing categories, you are taken to this page.

- **Parent.** Select a parent category for the new category from the existing category list.
- **Category.** Specify a name for the category that is about to be created.
- **Save** button. Hit Save in order to keep your changes and create the new activity category.

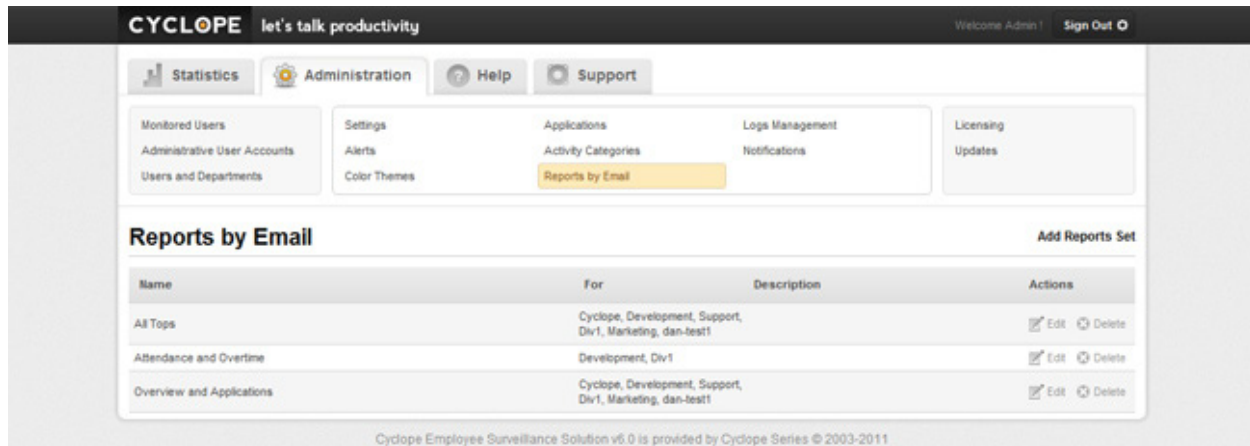

The screenshot displays the 'Add Activity Category' interface. At the top, the CYCLOPE logo and tagline 'let's talk productivity' are visible. The navigation bar includes 'Statistics', 'Administration', 'Help', and 'Support'. The 'Administration' section is expanded, showing sub-sections: 'Monitored Users', 'Administrative User Accounts', 'Users and Departments', 'Settings', 'Alerts', 'Color Themes', 'Applications', 'Activity Categories' (highlighted), 'Reports by Email', 'Logs Management', 'Notifications', and 'Licensing Updates'. The main form area is titled 'Add Activity Category'. It contains a 'Parent' dropdown menu with 'Uncategorised' selected and a 'Category' text input field. A 'Save' button with a checkmark icon is located at the bottom right of the form. The footer text reads: 'Cyclope Employee Surveillance Solution v6.0 is provided by Cyclope Series © 2003-2011'.

Img. 22, Add Activity Category page

## 2.14 Reports by Email

Information sections included in this page:

- **Data Table** containing the following information displayed on columns:
  - ü Name - The name of the defined email reports set.
  - ü For - The list of departments whose data is contained in the selected reports.
  - ü Description - The description associated with the email reports set (this field is optional).
  - ü Actions - Links for editing or deleting each reports set.

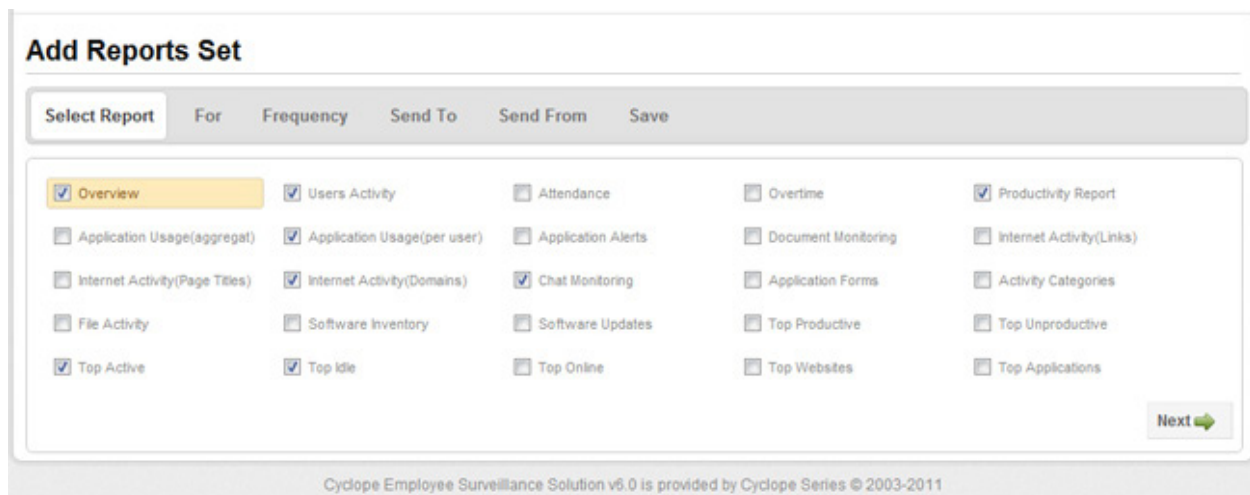

Img. 23, Reports by Email page

## 2.14 Add Reports Set

If you choose to add a new reports set or edit one of the existing sets, you are taken to this page. There are several steps required by the in-page wizard:

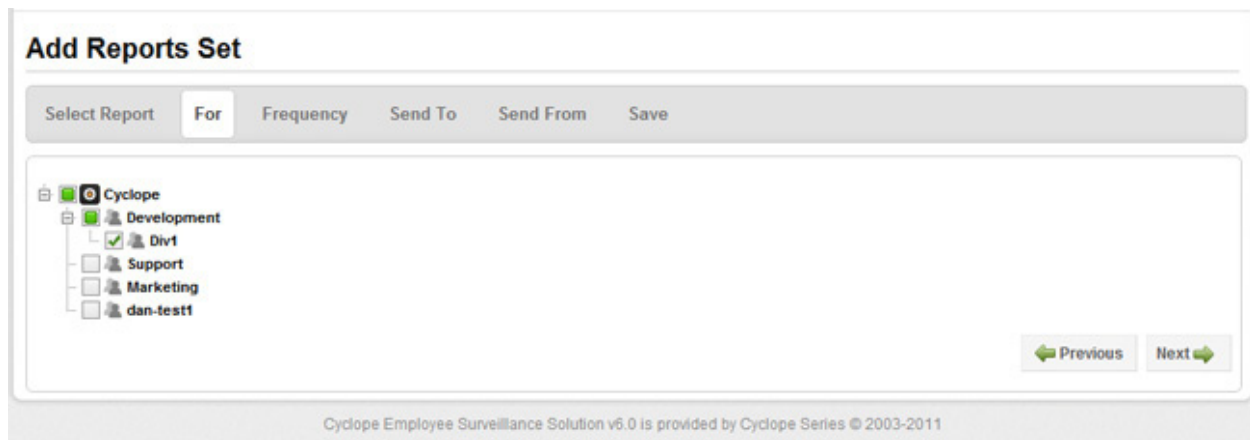

- **Select Report.** Check one or several reports from the list

Img. 24, Add Reports Set page

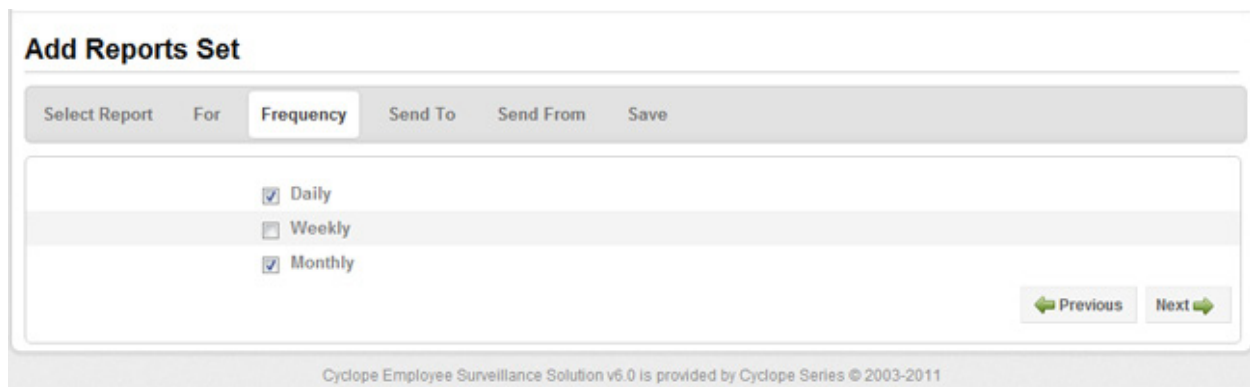

- **For.** Up next, you must specify the department(s) whose data should be contained by the selected reports.

Img. 25, Add Reports Set page

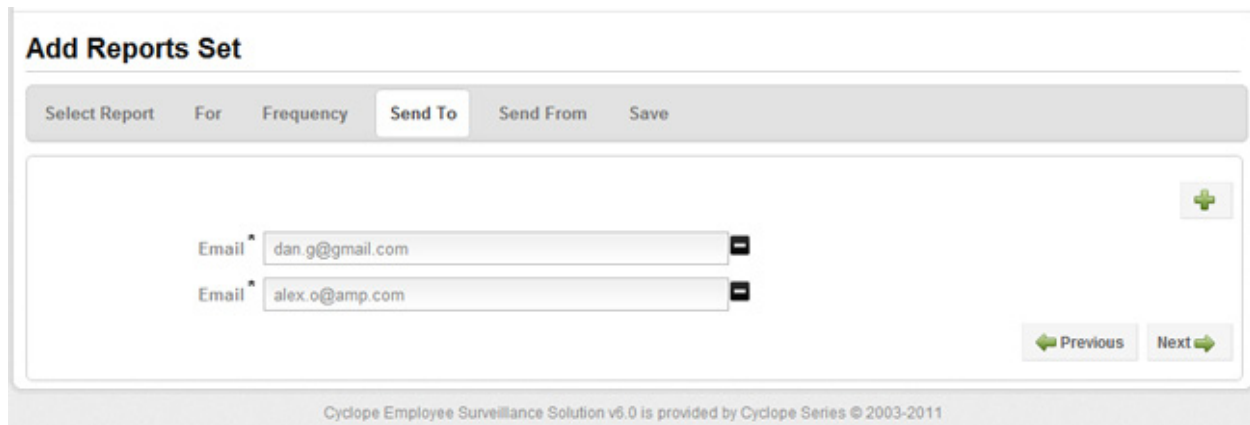

- **Frequency.** Choose how often you would like to receive the reports.

Img. 26, Add Reports Set page

*THE REPORTS WILL BE SENT TO THE SPECIFIED LIST OF EMAILS AT THE END OF THE SELECTED PERIOD. FOR EXAMPLE, IF THE DAILY OPTION IS CHECKED, TOMORROW AT 12:00 AM THE REPORTS CORRESPONDING TO TODAY'S DATE WILL BE SENT BY EMAIL.*

- **Send To.** Add one or several email addresses where you would like the reports to be sent.

**Add Reports Set**

Select Report For Frequency **Send To** Send From Save

Img. 28, Add Reports Set page

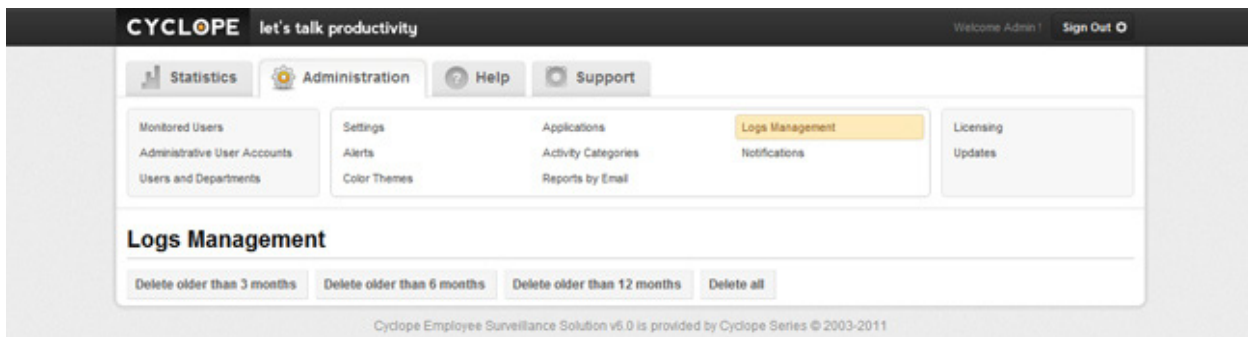

- **Save.** The last step of the wizard prompts you for a name for the reports set. You can also add a small description if you like. By pressing *Finish* you complete the process.

Img. 29, Add Reports Set page

## 2.15 Logs Management

This page allows a few basic delete operations on the already saved logs.

- There are **4 predefined options** each available at the click of a button. The options are: *Delete logs older than 3 months*, *Delete logs older than 6 months*, *Delete logs older than 12 months* and *Delete all logs*.

Img. 30, Logs Management page

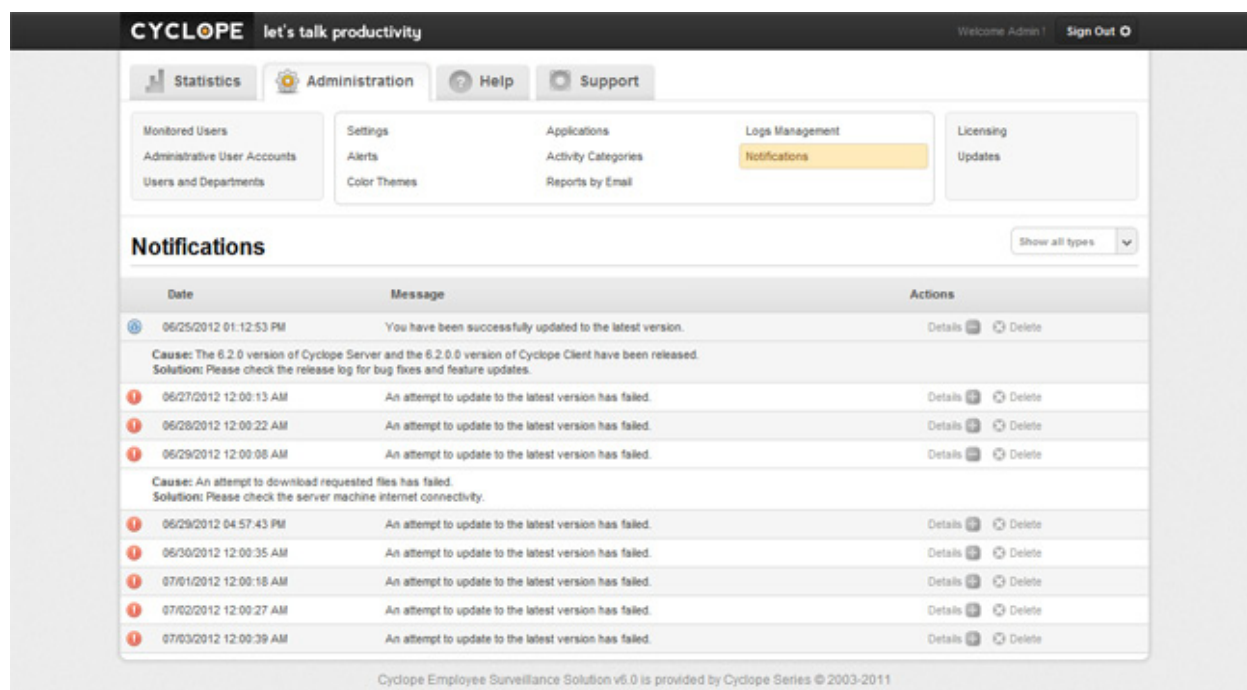

## 2.16 Notifications

**Information sections included in this page:**

- **Data Table** containing the following information displayed on columns:
  - ü Date - The date when the notification occurred.
  - ü Message - The text message of the notification.
  - ü Actions - Links for viewing further details and for deleting the notification.

*WHEN DELETING A NOTIFICATION, THAT PARTICULAR NOTIFICATION WILL NOT SHOW AGAIN ON THE INTERFACE.*

THERE ARE THREE TYPES OF NOTIFICATIONS: ERROR MESSAGES (DISTINGUISHED BY A RED ICON), WARNING MESSAGES (DISTINGUISHED BY A YELLOW ICON) AND INFORMATION MESSAGES (DISTINGUISHED BY A BLUE ICON).

Img. 32, Notifications page

## 2.17 Licensing

This page gives you information on the current status of the product.

- **Company Name.** The name of the company where Cyclope is installed.
- **Name.** The name of the manager or the IT administrator.
- **Email.** The email address used for contact.
- **Phone.** The phone number used for contact.
- **Country.** Select your location from the countries list.
- **Change License** button. By clicking on this button, you can change the licensing information.

YOU CAN ALSO SEE WHAT IS THE EXPIRATION DATE OF YOUR LICENSE AND WHAT IS THE NUMBER OF MONITORED COMPUTERS VS. THE NUMBER OF MONITORED COMPUTERS ALLOWED BY YOUR LICENSE.

The screenshot displays the 'Licensing' page of the Cyclope web application. The page has a dark header with the Cyclope logo and tagline 'let's talk productivity'. Below the header, there are navigation tabs for Statistics, Administration, Help, and Support. The 'Administration' tab is active, showing sub-menus for Monitored Users, Settings, Applications, Logs Management, and Licensing. The 'Licensing' sub-menu is highlighted. The main content area contains a form for entering licensing information. The form fields are: Company Name (Amplusnet), Name (Mihai Dumitru), Email (mihai.dumitru@amplusnet.com), Phone (empty), and Country (Romania). Below the form, there are two progress bars: 'Time Period: 04/07/2011 17:52 PM - 19/07/2011 17:52 PM' and 'Computers: 11 / 30'. The 'Change License' button is green and located at the bottom right of the form area.

Img. 31, Licensing page

### 2.17.1 Change License

Change the licensing information on this page.

- You can edit the information for **Company Name**, **Name**, **Email**, **Phone** and **Country**.
- **Installation Key**. This code is generated for the computer where Cyclope Server is installed.
- **License Key**. Paste here the license code that you receive from Cyclope Support Team.
- **Activate License** button. Click this button to activate the license and start/continue using the application.
- **Start Evaluation** button. Click this button to receive a free trial period for Cyclope.

*NOTE: THIS BUTTON IS AVAILABLE ONLY WHEN YOU INSTALL CYCLOPE FOR THE FIRST TIME AND YOU ARE BROUGHT TO THIS PAGE.*

Img. 32, Licensing page

## 2.17 Updates

Cyclope now offers you the latest product updates right within the user interface. See on this page if are there any new releases and what are the changes they bring.

- Each product release is listed in the **Updates** list and holds the following information:
  - ü A tick icon indicating the current version installed.
  - ü Version - The version number.
  - ü Change Log - A small list pointing the most important changes.
  - ü Download Data - The date when the update was released.
  - ü Actions - A link to Update to the latest version (appears near newer versions) or a link to perform a Rollback (appears near older versions).

Img. 33, Licensing page

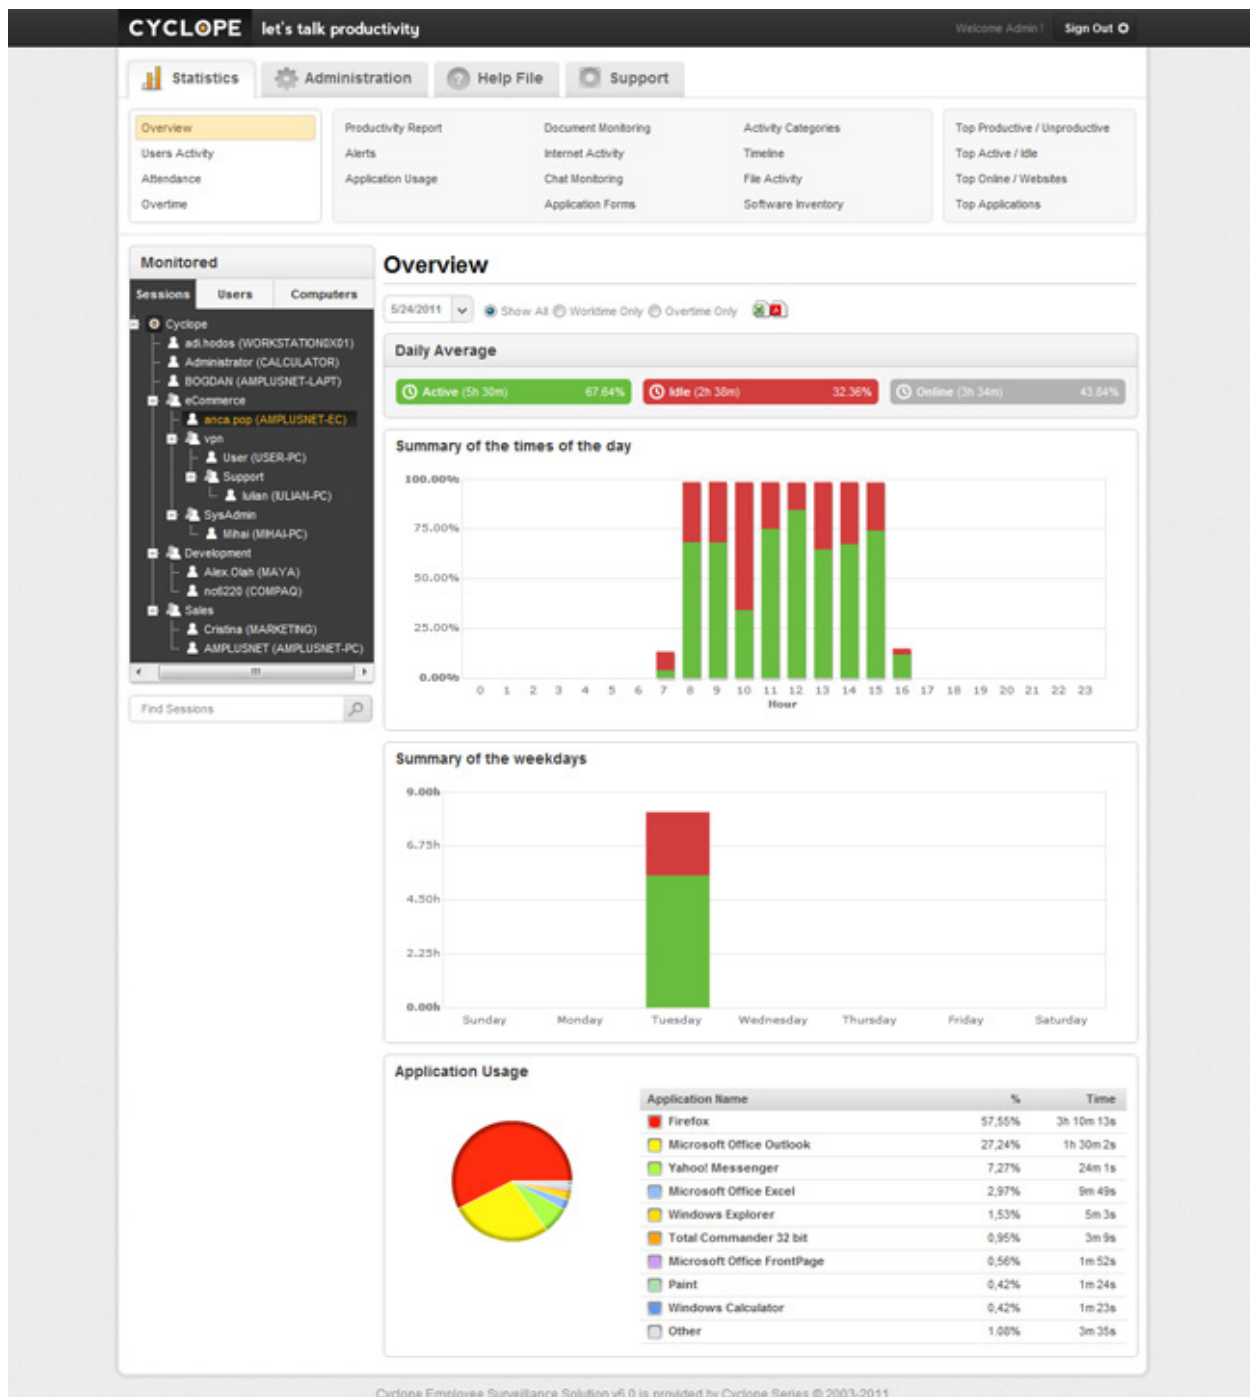

## 3. Manage application reports

### 3.1 Overview

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Daily Average**, consisting of **Active Time**, **Idle Time** and **Online Time**, each of them showing both numeric and percentage values.
- **Summary of the times of the day** chart. This chart shows the daily activity on hourly basis. If the selected time frame includes more than one day, the chart will display the average activity, corresponding to that particular time interval.
- **Summary of the days of the week** chart. This chart shows the weekly activity on daily basis. If the selected time frame includes more than a week, the chart will display the average activity, corresponding to that particular time interval.
- **Application Usage**. This section includes a table with the first 9 most used applications arranged in descending order of their usage time, a link with the generic title Other where all the other used applications can be viewed and a pie chart depicting the same classification.

Img. 34, Overview page

AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. IF THE PRIVATE TIME OPTION IS DEFINED AND ACTIVE, THE PRIVATE TIME WILL APPEAR IN GREY ON THE GRAPHIC CHART.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

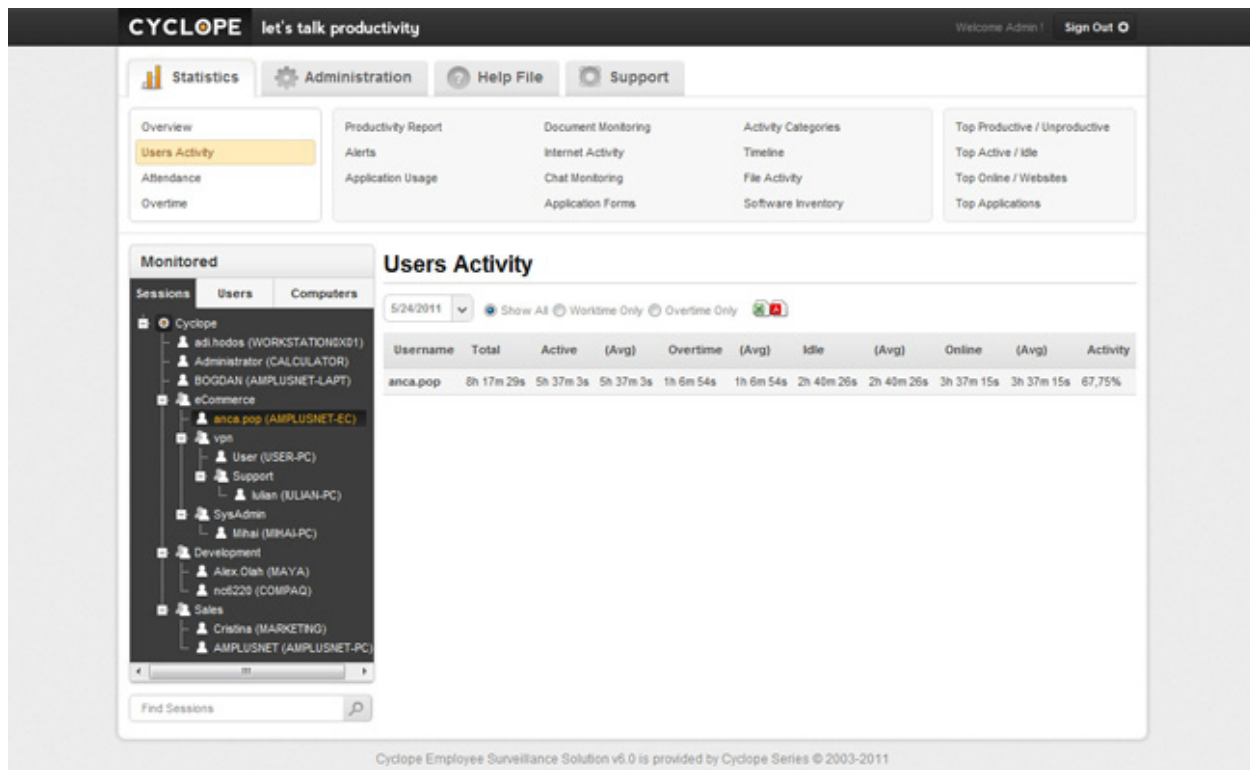

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

## 3.2 Users Activity

### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü Total - the total time recorded for the current selection in tree view.
  - ü Active - the amount of active time recorded for the current selection in tree view.
  - ü Overtime - the amount of overtime hours recorded for the current selection in tree view.
  - ü Idle - the amount of inactive time recorded for the current selection in tree view.
  - ü Online - the amount of time spent online recorded for the current selection in tree view.
  - ü Activity - the percentage represented by the active time relative to the total time recorded for the current selection in tree view.

*NOTE: THE COLUMNS ACTIVE, OVERTIME, IDLE AND ONLINE ARE FOLLOWED BY AN ADDITIONAL COLUMN CONTAINING THE AVERAGE AMOUNT OF TIME CORRESPONDING TO EACH TYPE OF DATA PRESENTED IN THE ENUMERATED COLUMNS.*

Img. 35, Users Activity page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.3 Attendance

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü Date - The date of the monitored day
  - ü Start Work - The time when the first client log was received on the server.
  - ü End Work - The time when the last client log was received on the server.
  - ü Total Time - The total recorded time.
  - ü Active - The amount of time when the employee was active.
  - ü Idle - The amount of time when the employee was not active.
  - ü Overtime - The amount of time recorded outside the defined working schedule.
  - ü Private - The amount of time when the user's actions remained private.

The screenshot shows the CYCLOPE web interface. At the top, there's a header with the CYCLOPE logo and 'let's talk productivity'. Below the header, there are navigation tabs: Statistics, Administration, Help File, and Support. The main content area is divided into several sections. On the left, there's a 'Monitored' section with a tree view showing a hierarchy of users and computers. The 'Attendance' section is highlighted, showing a date picker set to 5/24/2011 and a table of activity data. The table has columns for Username, Date, Start Work, End Work, Total Time, Active, Idle, Overtime, and Private. The data row shows 'anca.pop' on 24/05/2011 with various time metrics. The footer of the page states 'Cyclope Employee Surveillance Solution v6.0 is provided by Cyclope Series © 2003-2011'.

Img. 36, Attendance page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All*, *Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

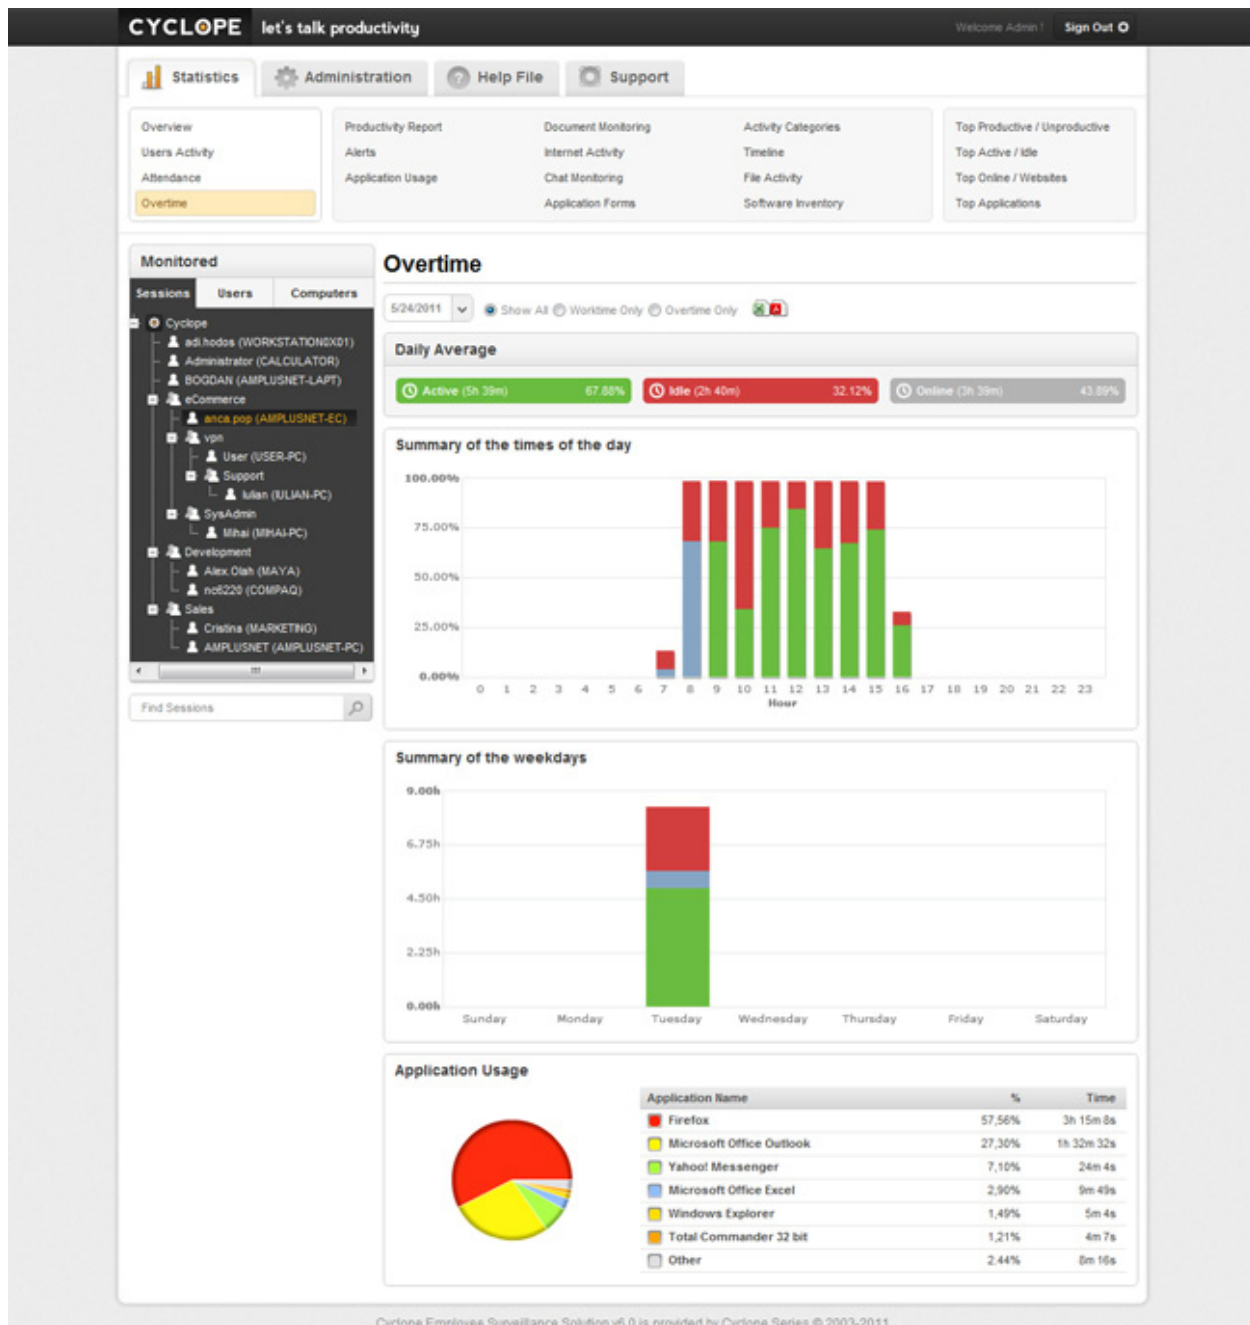

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.4 Overtime

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Daily Average**, consisting of **Active Time**, **Idle Time** and **Online Time**, each of them showing both numeric and percentage values.
- **Summary of the times of the day** chart. This chart shows the daily activity on hourly basis. If the selected time frame includes more than one day, the chart will display the average activity, corresponding to that particular time interval.
- **Summary of the days of the week** chart. This chart shows the weekly activity on daily basis. If the selected time frame includes more than a week, the chart will display the average activity, corresponding to that particular time interval.
- **Application Usage**. This section includes a table with the first 6 most used applications arranged in descending order of their usage time, a link with the generic title *Other* where all the other used applications can be viewed and a pie chart depicting the same classification.

Img. 37, Overtime page

AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. IF THE PRIVATE TIME OPTION IS DEFINED AND ACTIVE, THE PRIVATE TIME WILL APPEAR IN GREY ON THE GRAPHIC CHART. THE SPECIFIC GRAPHIC ELEMENT OF THIS PAGE IS THE REPRESENTATION OF THE RECORDED OVERTIME IN BLUE ON THE RENDERED GRAPHIC CHART.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or

Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All*, *Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

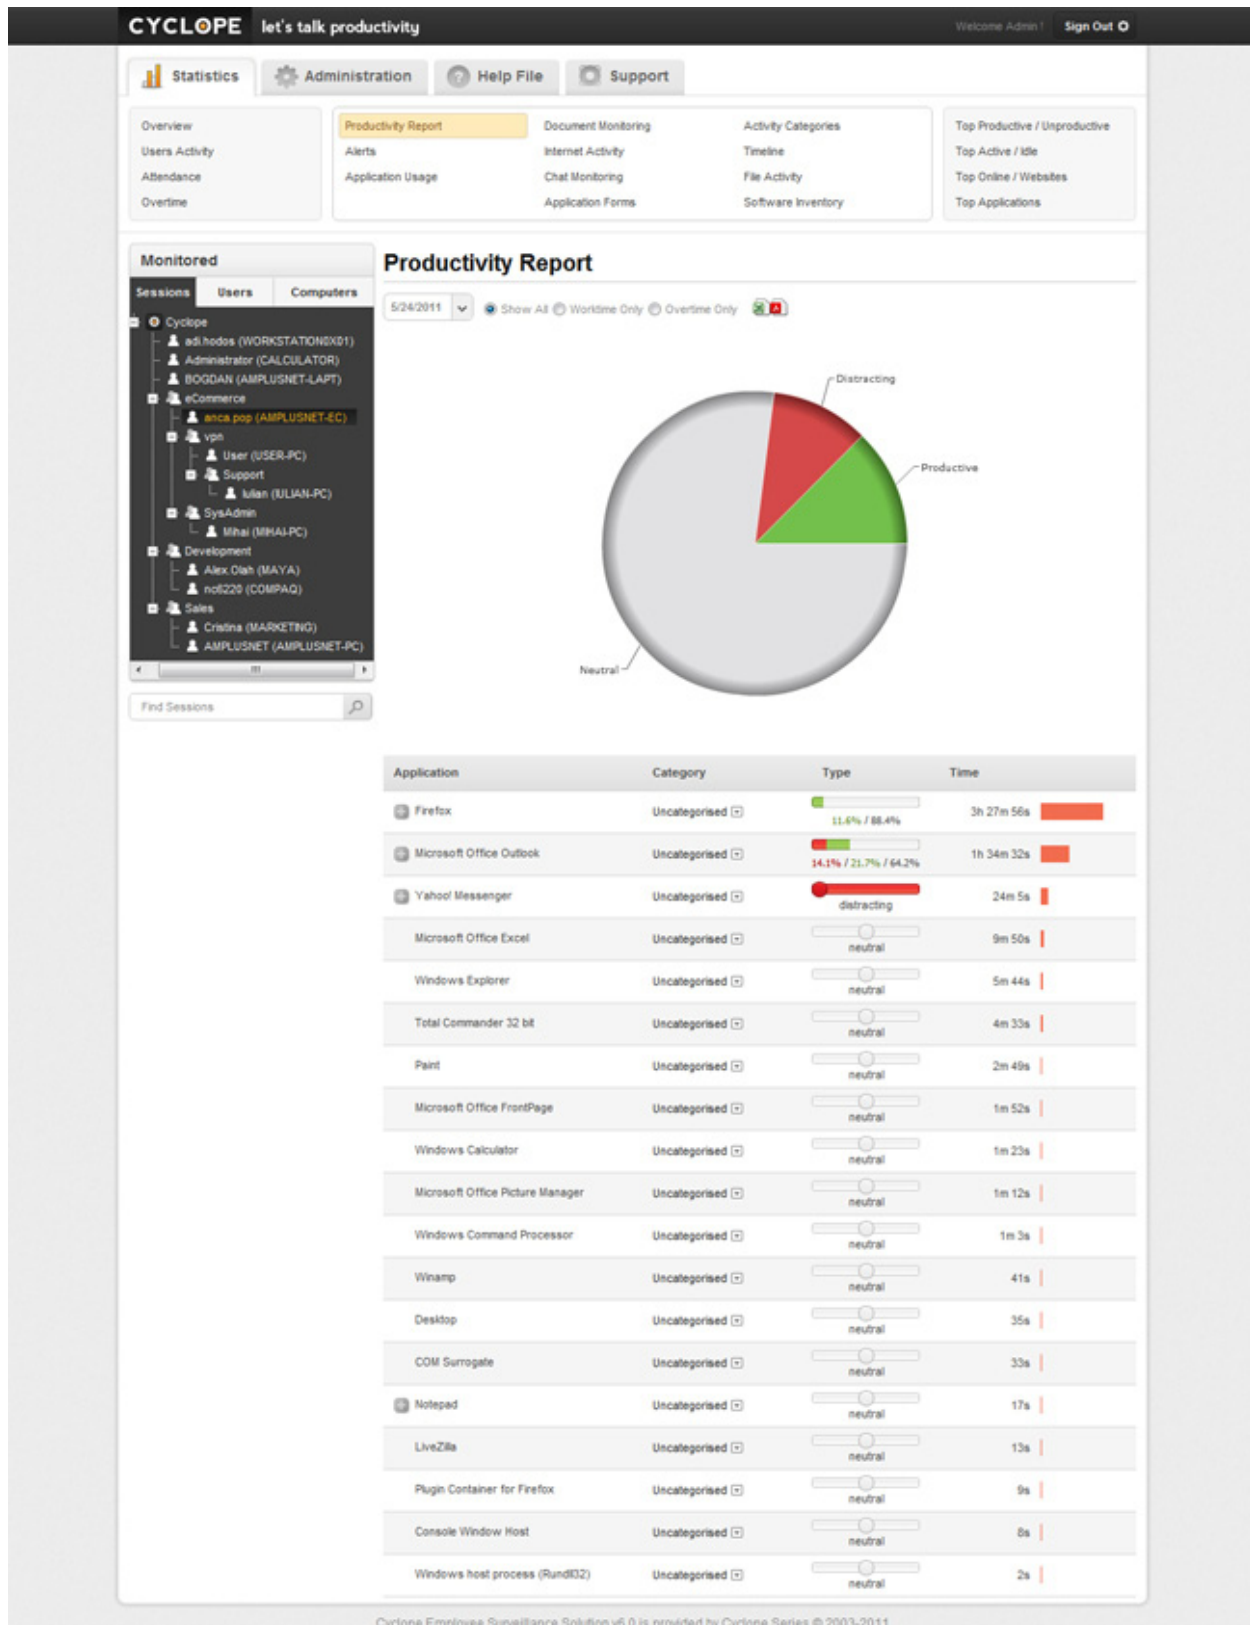

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.5 Productivity Report

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Data Table** containing the following information displayed on columns:
  - ü Application - The name of the recorded application.
  - ü Category - A dropdown selection where the user can assign to an application one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Type - By operating this slider, the user can choose whether an application is **productive** or **distracting**. The default value is **neutral**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Time - Usage time for the recorded application.
  - ü Graphic bar - Colored bar corresponding to the application usage time.

*THE APPLICATIONS WITH A PLUS SIGN ICON PRECEDING THEIR NAME CAN BE EXPANDED AND THE USER CAN ACCESS A DETAILED VIEW ON ALL THE WINDOWS RECORDED FOR THAT APPLICATION. BY SWITCHING THE SLIDER AT APPLICATION LEVEL, ALL ITS CHILDREN WILL INHERIT THIS SETTING. IF, ON THE OTHER HAND, THE USER CHOOSES TO CHANGE THE SLIDER FOR ONE OF THE APPLICATION'S CHILDREN, THE MAIN SLIDER WILL BE REPLACED WITH A GRAPHIC BAR SHOWING THE PERCENTAGE CONFIGURATION OF PRODUCTIVE, DISTRACTING AND UNCATEGORIZED CHILD WINDOWS FOR THE APPLICATION IN CAUSE.*

Img. 38, Productivity Report page

*AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. KEEPING THE SAME CONCEPT, THE PIE CHART ON THIS PAGE SHOWS THE PRODUCTIVE APPLICATIONS IN GREEN AND THE DISTRACTING APPLICATIONS IN RED; THE UNCATEGORIZED APPLICATIONS REMAIN GREY.*

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

## 3.6 Alerts

### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü Alert Name - The name of the triggered alert.
  - ü Alert Type - The type of the triggered alert.
  - ü Details - Employee activity details that infringed with the triggered alert's rule.
  - ü Rule - The rule of the triggered alert.
  - ü Date - The date when the alert was triggered.

The screenshot shows the CYCLOPE Alerts page. The top navigation bar includes 'CYCLOPE let's talk productivity', 'Welcome Admin!', and 'Sign Out'. Below this, there are tabs for 'Statistics', 'Administration', 'Help File', and 'Support'. The 'Alerts' tab is selected, showing a list of alerts for the date 6/02/2011. The table below lists several alerts, including Google Chrome Alerts, Online Time Alerts, and Idle Time Alerts for various users like adi.hodos and Administrator. A sidebar on the left shows a tree view of monitored sessions and users, including 'Cyclope', 'Administrator (CALCULATOR)', 'Administrator (APPSRV)', 'BOGDAN (AMPLUSNET-LAPT)', 'Dan Gurgian (ASUS)', 'Dan Gurgian (APPSRV)', 'eCommerce', 'anca.pop (AMPLUSNET-EC)', 'vpn', 'User (USER-PC)', 'Support', 'Iulian (IULIAN-PC)', 'SysAdmin', 'Mihai (MIHAI-PC)', 'Development', 'Alex.Olah (MAYA)', 'no6220 (COMPAQ)', 'Sales', 'Cristina (MARKETING)', and 'AMPLUSNET (AMPLUSNET-PC)'.

User Name	Alert Name	Alert Type	Details	Rule	Date
adi.hodos	Google Chrome Alert	Applications Alert	Google Chrome (1h 34m 31s)	Google Chrome (2m 0s)	02/06/2011 01:31 PM
Administrator	Online Time Alert	Online Time Alert	6m 4s	30m 0s	02/06/2011 01:08 PM
adi.hodos	Online Time Alert	Online Time Alert	45m 45s	30m 0s	02/06/2011 01:08 PM
Administrator	Idle Time Alert	Idle Time Alert	13h 13m 0s	2h 0m 0s	02/06/2011 01:05 PM
adi.hodos	Idle Time Alert	Idle Time Alert	9h 19m 59s	2h 0m 0s	02/06/2011 01:05 PM

Cyclope Employee Surveillance Solution v6.0 is provided by Cyclope Series © 2003-2011

Img. 39, Alerts page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

## 3.7 Application Usage

### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.

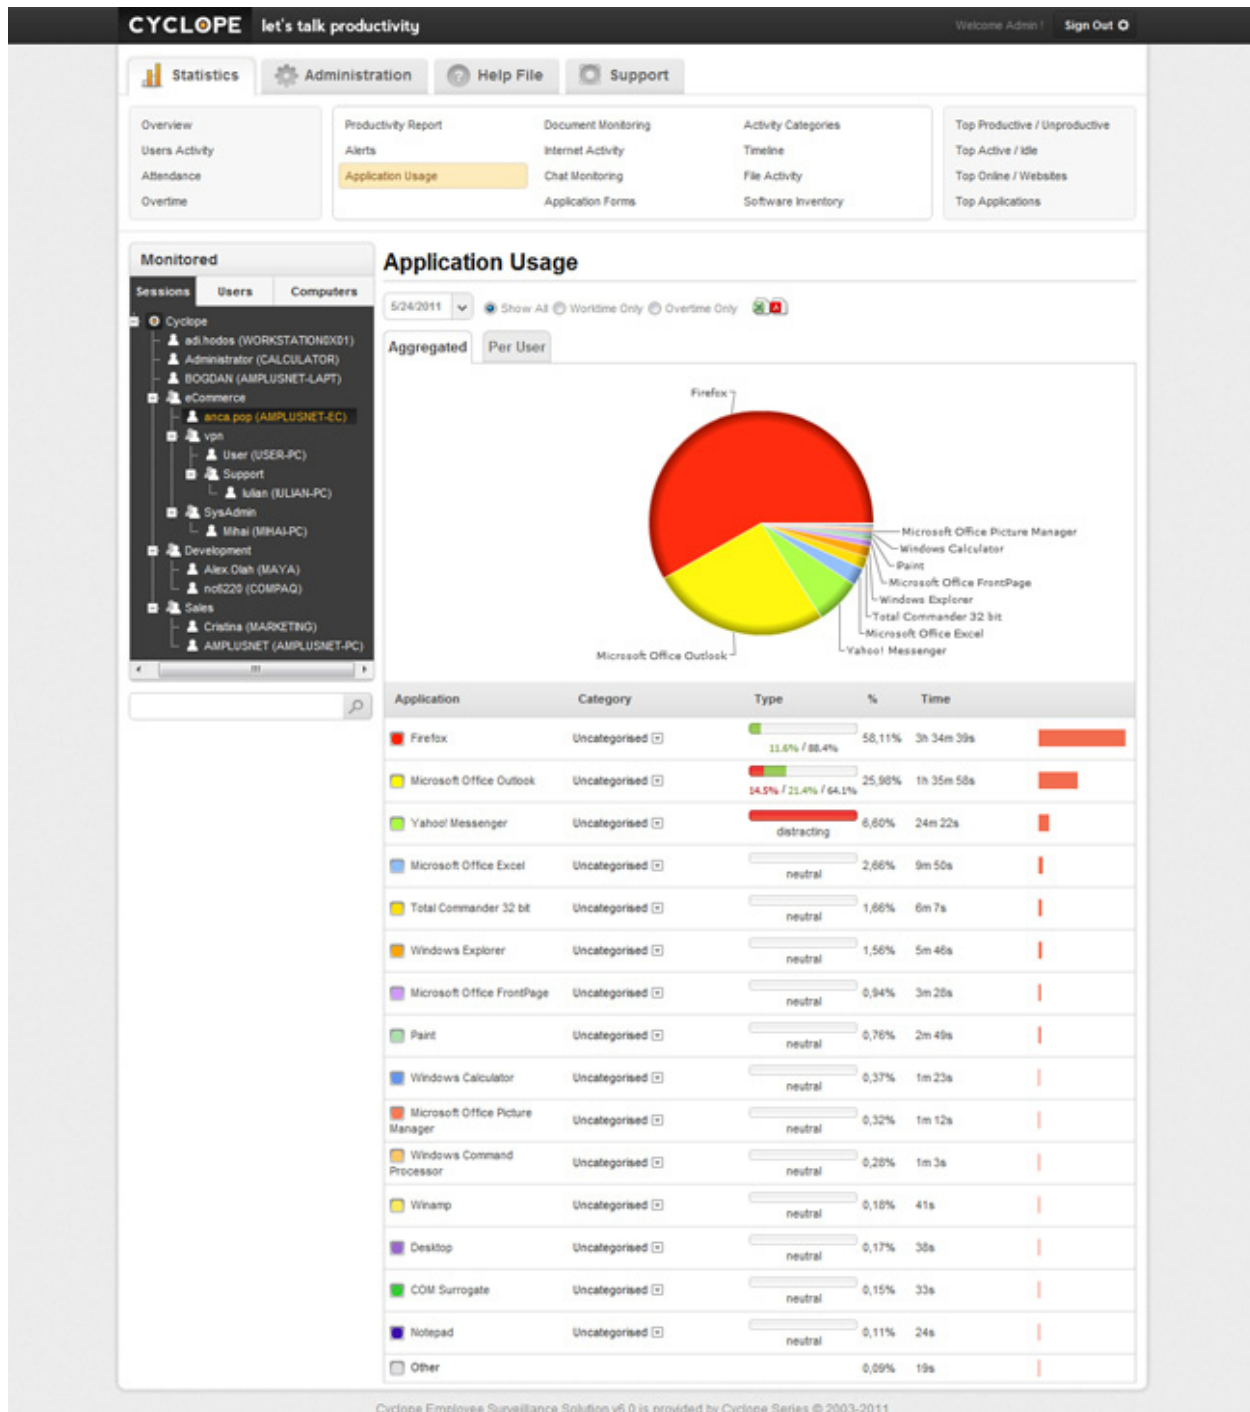

#### 3.7.1 Aggregated mode

- **Data Table** containing the following information displayed on columns:
  - ü Application - The name of the recorded application.
  - ü Category - A dropdown selection where the user can assign to an application one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Type - A graphic indicator showing the current setting for the application. The possible values and colors are: **productive (green)**, **distracting (red)** and **neutral (grey)**. If the monitored application is classified as Document, Browser or Chat (involving the detailed listing of all its child windows), and if the child windows of the same parent have different settings, the graphic indicator displays the percentage held by each of the three values enounced above, as well as the afferent numeric values.
  - ü % - The percent of application usage time relative to the total recorded time.
  - ü Time - Usage time for the recorded application.
  - ü Graphic bar - Colored bar corresponding to the application usage time.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a pie chart when the tree view selection is resumed at one employee. If the selected tree view item is a department, the chart is rendered as a set of stacked bars each one corresponding to a monitored user in that department.

#### 3.7.2 Per user mode

- **Data Table** containing the following information displayed on columns:
  - ü User - The username used by the employee on the monitored station.
  - ü Application - The name of the recorded application.
  - ü Category - A dropdown selection where the user can assign to an application one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü % - The percent of application usage time relative to the total recorded time.
  - ü Time - Usage time for the recorded application.
  - ü Graphic bar - Colored bar corresponding to the application usage time.

*IF THE SELECTED TREE VIEW ITEM IS A DEPARTMENT, THE DATA IS FIRST GROUPED BY THE EMPLOYEES' USERNAMES AND SECONDLY BY THE USAGE TIME OF THE MONITORED APPLICATIONS.*

Img. 40, Applications Usage page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All*, *Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

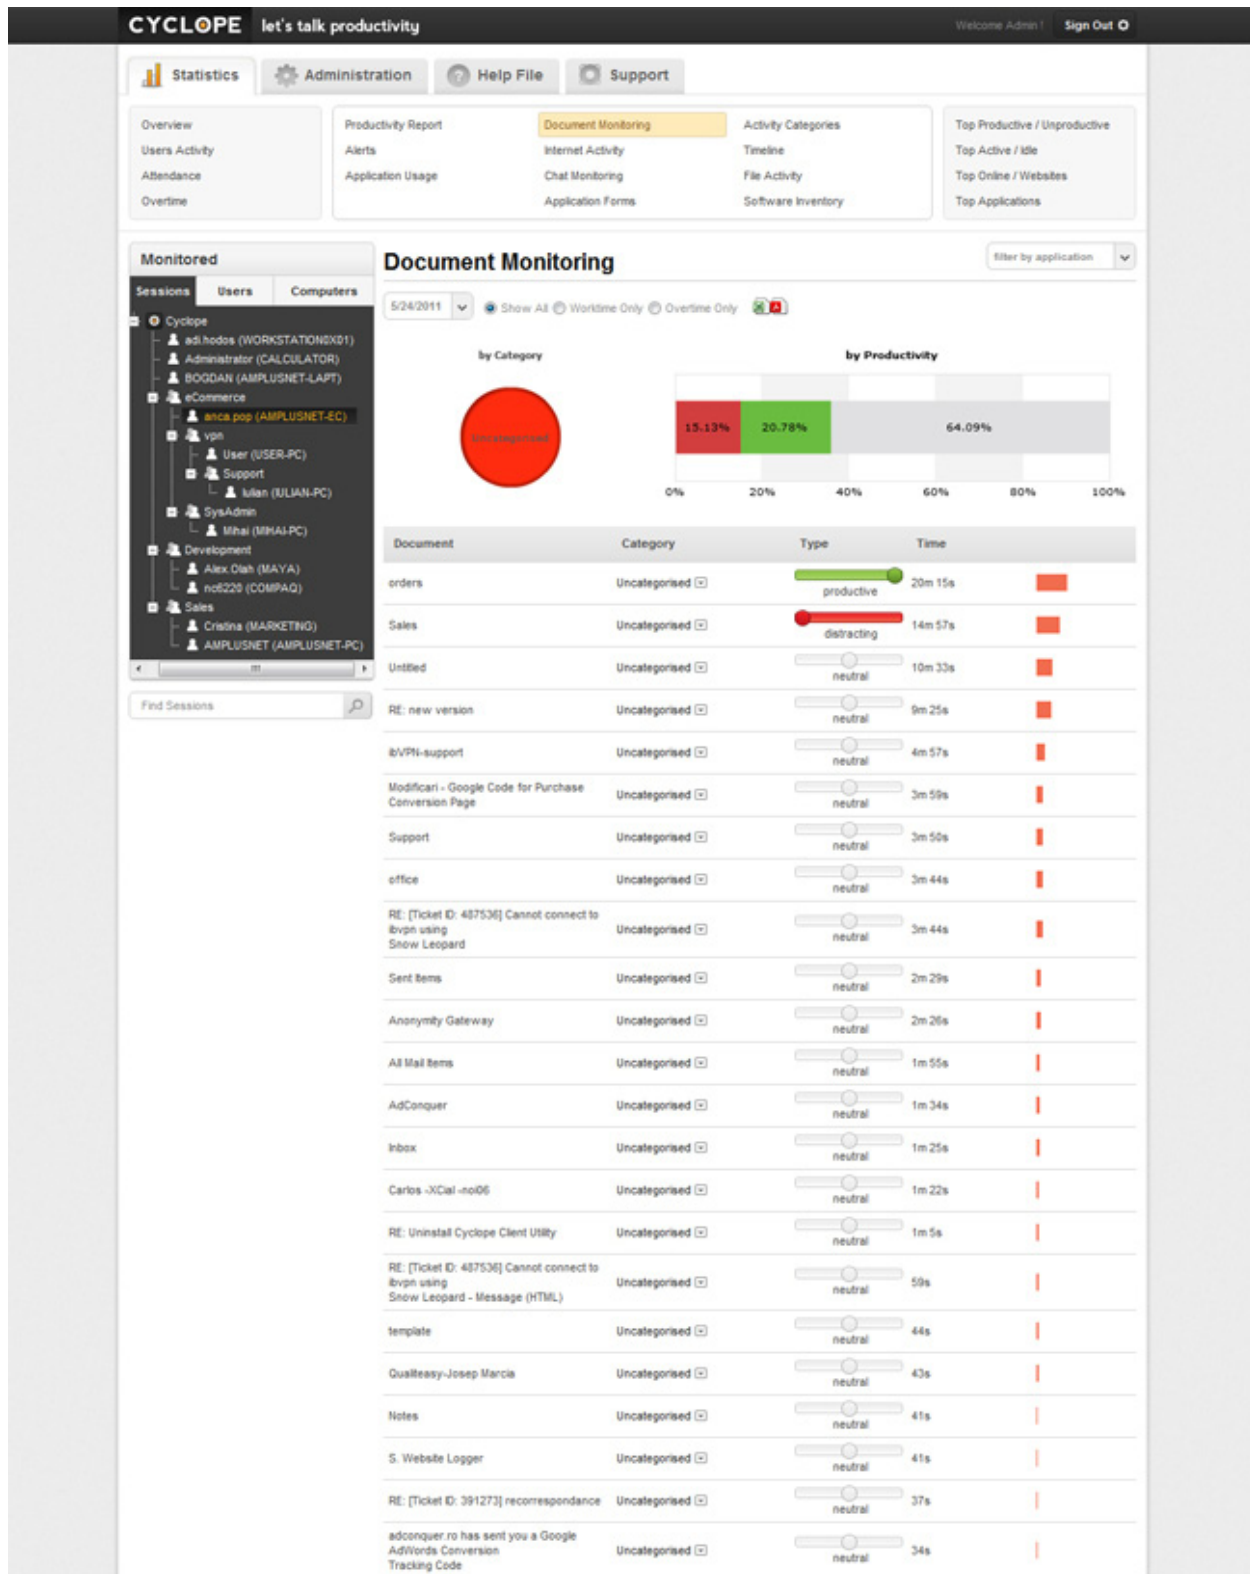

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.8 Document Monitoring

Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Pie Chart** illustrating the usage of all the monitored documents, grouped by the Category they are assigned to.
- **Bar Chart** illustrating the usage of all monitored documents, grouped by their assigned productive status (productive, distracting, or neutral).
- **Data Table** containing the following information displayed on columns:
  - ü Document - The name of the recorded Document.
  - ü Category - A dropdown selection where the user can assign to a document one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Type - By operating this slider, the user can choose whether a document is **productive** or **distracting**. The default value is **neutral**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Time - Usage time for the recorded document.
  - ü Graphic bar - Colored bar corresponding to the document usage time.

Img. 41, Document Monitoring page

AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. KEEPING THE SAME CONCEPT, THE PRODUCTIVITY CHART ON THIS PAGE SHOWS THE PRODUCTIVE DOCUMENTS IN GREEN AND THE DISTRACTING DOCUMENTS IN RED; THE UNCATEGORIZED DOCUMENTS REMAIN GREY.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only and Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

A dropdown filter allows the user to filter the data table by any of the applications having the type set to 'Document', recorded in the database for the monitored stations.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.9 Internet Activity

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions, Users** and **Computers**, organized on separate tabs.

#### 3.9.1 Domains

- **Pie Chart** illustrating the usage of all the visited domains, grouped by the Category they are assigned to.
- **Bar Chart** illustrating the usage of all the visited domains, grouped by their assigned productive status (productive, distracting, or neutral).
- **Data Table** containing the following information displayed on columns:
  - ü Domain - The name of the recorded web domain.
  - ü Category - A dropdown selection where the user can assign to a domain one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Type - By operating this slider, the user can choose whether a domain is **productive** or **distracting**. The default value is **neutral**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Time - Usage time for the recorded domain.

- ü Graphic bar - Colored bar corresponding to the time spent on the recorded domain.

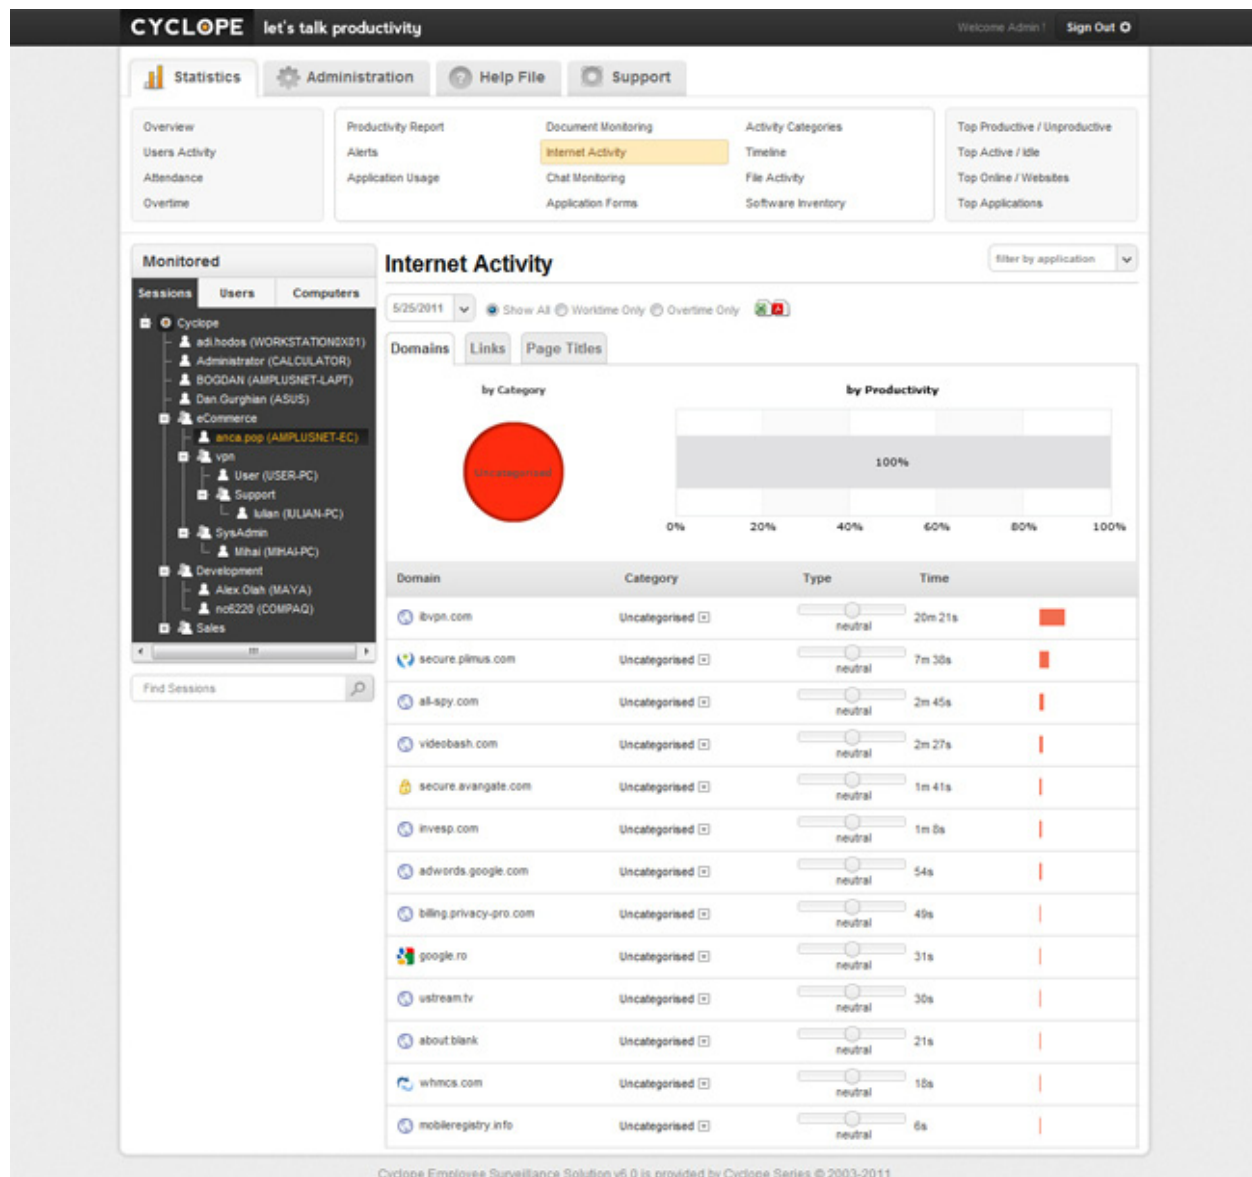

### 3.9.2 Links

- **Data Table** containing the following information displayed on columns:
  - ü Webpage Link - The full URL of the recorded web site.
  - ü Type - A graphic indicator showing the current setting for each web site. The possible values and colors are: **productive (green)**, **distracting (red)** and **neutral (grey)**.
  - ü Time - Usage time for the recorded web site.
  - ü Graphic bar - Colored bar corresponding to the time spent on the recorded web site.

### 3.9.3 Page Titles

- **Data Table** containing the following information displayed on columns:
  - ü Window - The title of the recorded web page.
  - ü Type - A graphic indicator showing the current setting for each web page. The possible values and colors are: **productive (green)**, **distracting (red)** and **neutral (grey)**.
  - ü Time - Usage time for the recorded web page.
  - ü Graphic bar - Colored bar corresponding to the time spent on the recorded web page.

Img. 42, Internet Activity page

AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. KEEPING THE SAME CONCEPT, PRODUCTIVITY CHART ON THIS PAGE SHOWS THE PRODUCTIVE DOMAINS IN GREEN AND THE DISTRACTING DOMAINS IN RED; THE UNCATEGORIZED DOMAINS REMAIN GREY.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

A dropdown filter allows the user to filter the data table by any of the applications having the type set to 'Browser', recorded in the database for the monitored stations.

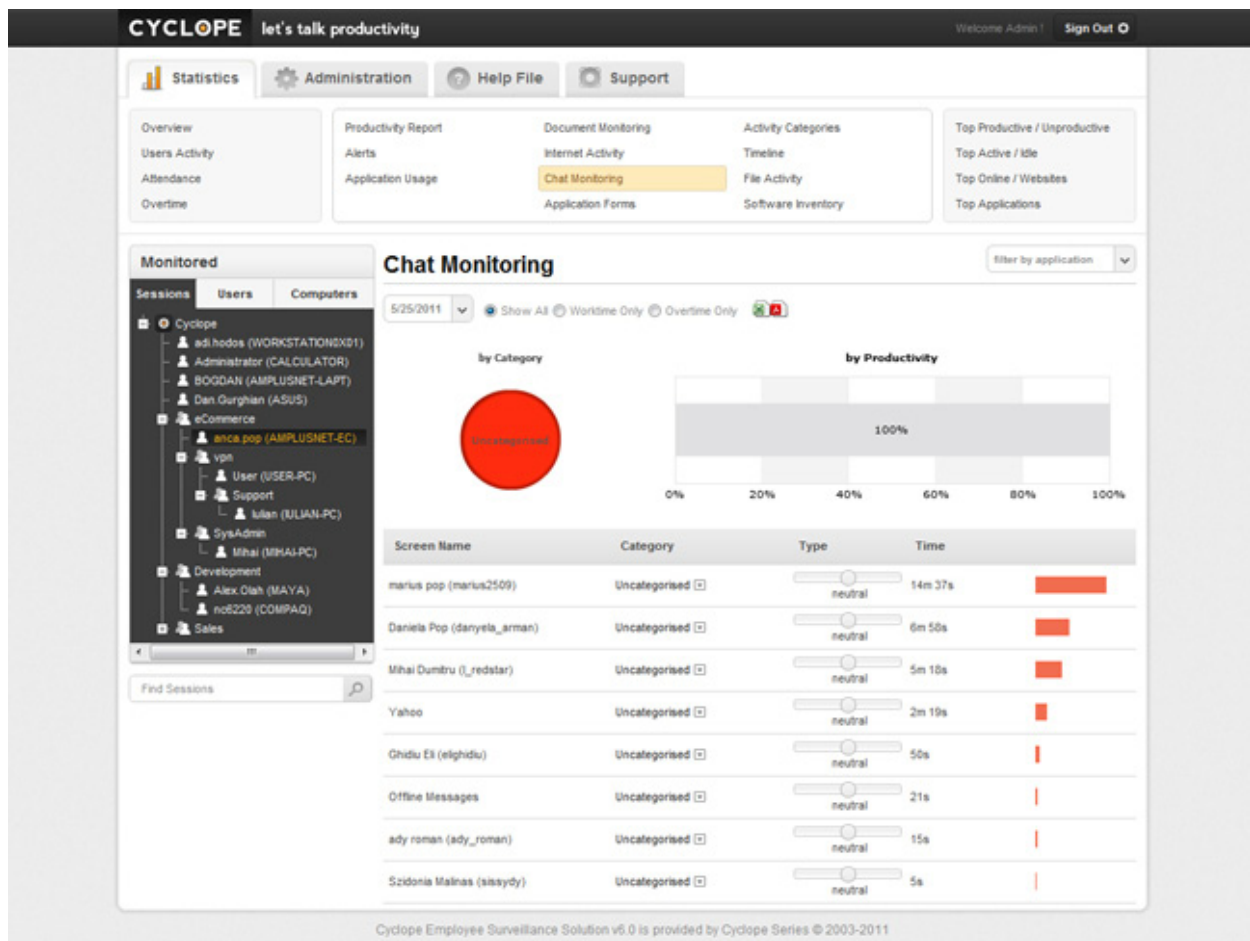

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.10 Chat Monitoring

Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Pie Chart** illustrating the usage of all the monitored chat windows, grouped by the Category they are assigned to.
- **Bar Chart** illustrating the usage of all monitored chat windows, grouped by their assigned productive status (productive, distracting, or neutral).
- **Data Table** containing the following information displayed on columns:
  - ü Screen Name - The name of the recorded chat window.
  - ü Category - A dropdown selection where the user can assign to a chat window one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Type - By operating this slider, the user can choose whether a chat window is **productive** or **distracting**. The default value is **neutral**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü Time - Usage time for the recorded chat window.
  - ü Graphic bar - Colored bar corresponding to the chat window usage time.

Img. 43, Chat Monitoring page

AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. KEEPING THE SAME CONCEPT, THE PRODUCTIVITY CHART ON THIS PAGE SHOWS THE PRODUCTIVE CHAT WINDOWS IN GREEN AND THE DISTRACTING CHAT WINDOWS IN RED; THE UNCATEGORIZED CHAT WINDOWS REMAIN GREY.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

A dropdown filter allows the user to filter the data table by any of the applications having the type set to 'Chat', recorded in the database for the monitored stations.

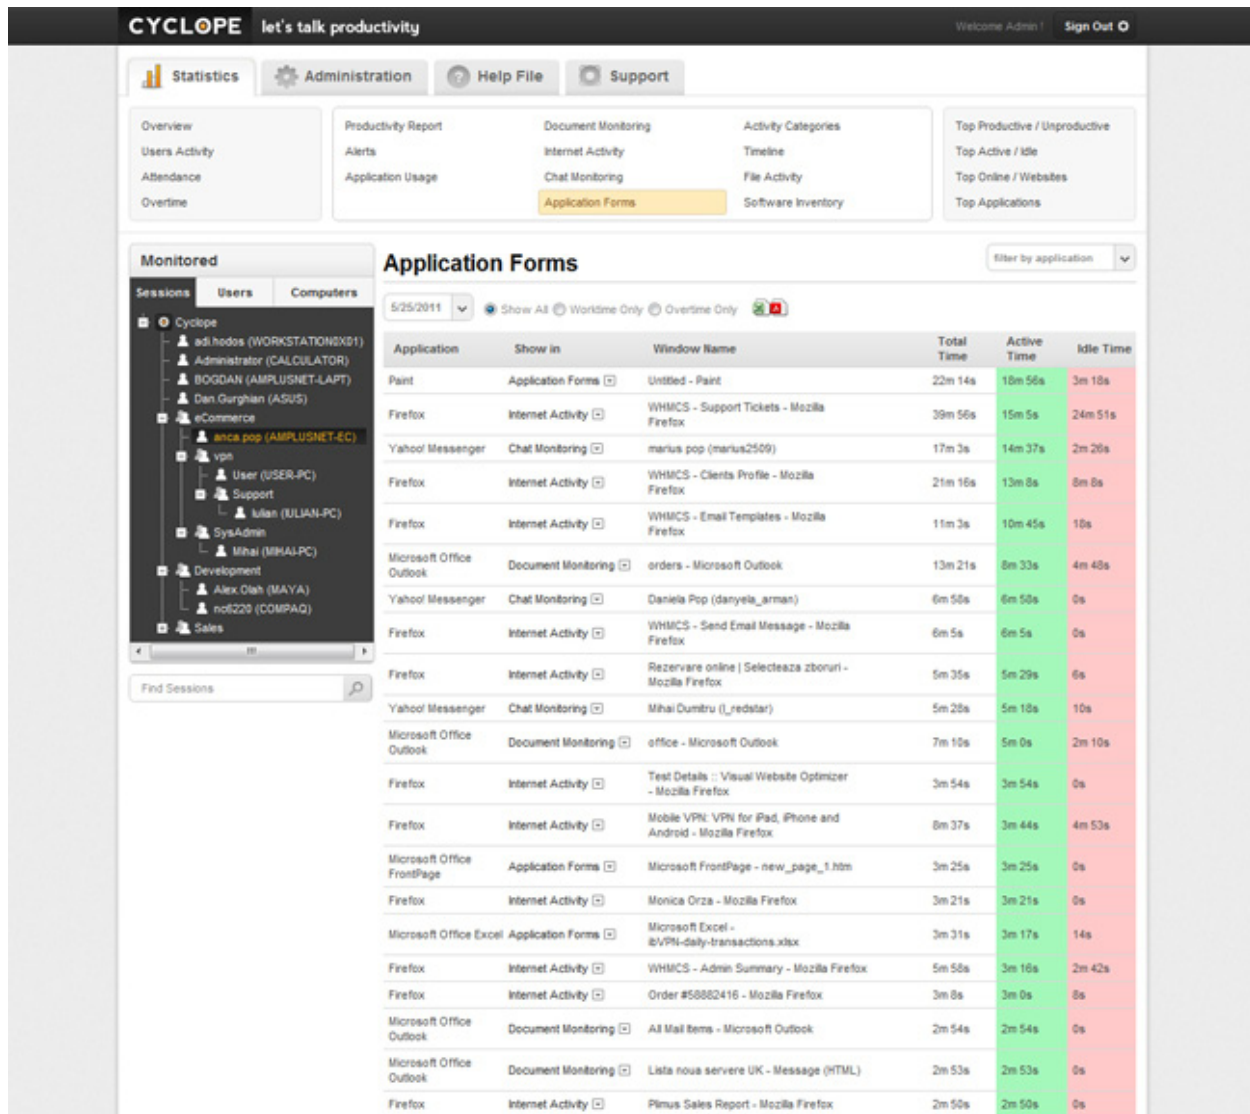

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters. .

### 3.11 Application Forms

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Pie Chart** illustrating the usage of all the monitored windows, grouped by the Category they are assigned to.
- **Bar Chart** illustrating the usage of all monitored windows, grouped by their assigned productive status (productive, distracting, or neutral).
- **Data Table** containing the following information displayed on columns:
  - ü Application - The name of the application whose window is being listed.
  - ü Show In - The name of the report where this window appears.
  - ü Window Name - The name of the monitored window.
  - ü Total Time - Total time spent on the recorded window.
  - ü Active Time - The time spent on the monitored window being active.
  - ü Idle Time - The time spent on the monitored window being inactive.

Img. 44, Application Forms page

AS A GENERAL CONVENTION THROUGHOUT THE CYCLOPE CHARTS, THE ACTIVE TIME IS RENDERED IN GREEN, WHILST THE IDLE TIME IS DEPICTED IN RED. KEEPING THE SAME CONCEPT, THE ACTIVE TIME COLUMN FROM THE TABLE HAS ITS BACKGROUND COLORED IN GREEN AND THE IDLE TIME COLUMN HAS A RED BACKGROUND.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined

working schedule. If the working schedule has not been modified, the default working schedule will be considered.

A dropdown filter allows the user to filter the data table by any of the applications having the type set to 'Chat', recorded in the database for the monitored stations.

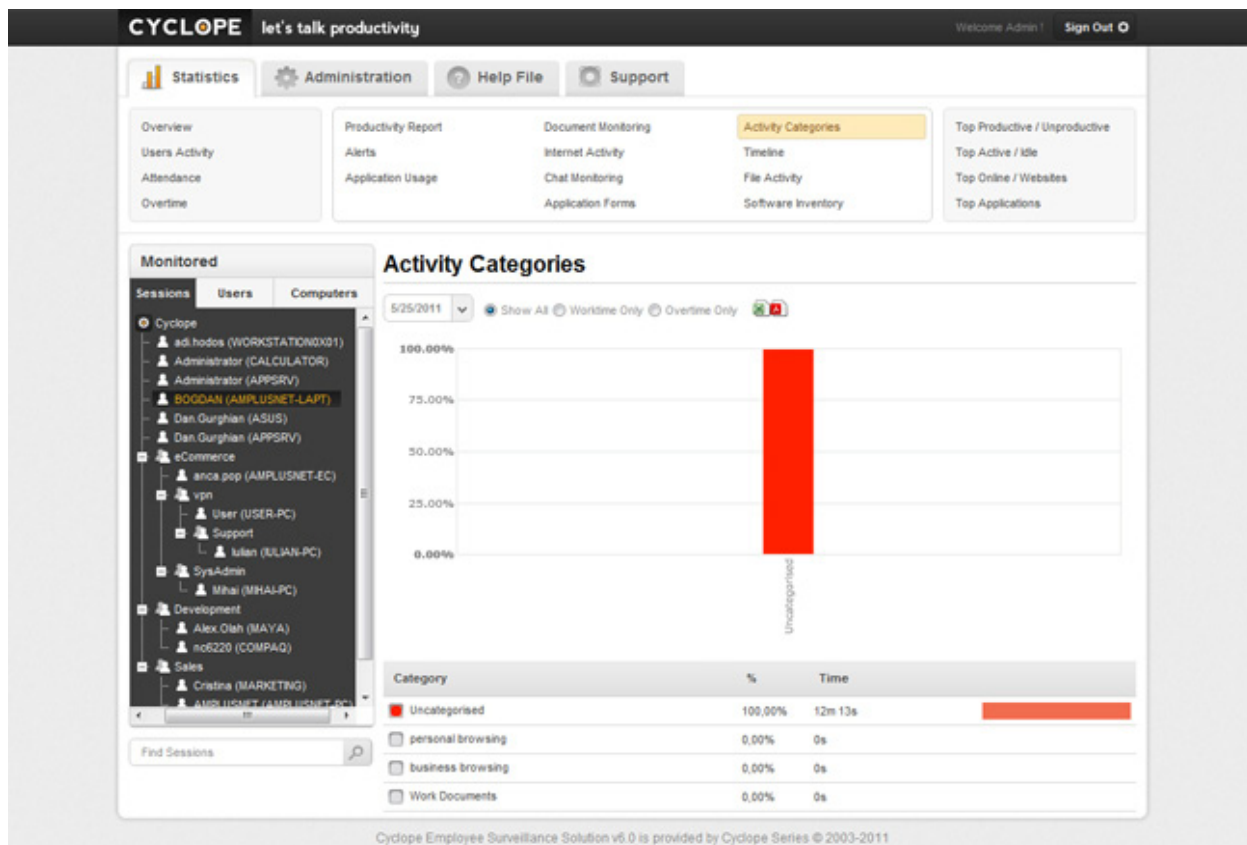

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.12 Activity Categories

**Information sections included in this page:**

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Graphic Chart** presenting the usage of all defined categories.
- **Data Table** containing the following information displayed on columns:
  - ü Category - The name of the category.
  - ü % - The percentage of usage for each category.
  - ü Time - The recorded time for each category.
  - ü Graphic bar - Colored bar corresponding to the time recorded for each category.

Img. 45, Application Forms page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.13 Timeline

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Graphic Chart** presenting the timeline with the usage succession of all recorded applications for the specified date.
- **Data Table** containing the following information displayed on columns:
  - ü Hour - On this page, the displayed information is grouped for each hour of the monitored time period.
  - ü Total - The amount of time (and also the start and end time stamp) for each continuous usage period of an application.
  - ü Application - The applications that were used by the employee, displayed in chronological order.

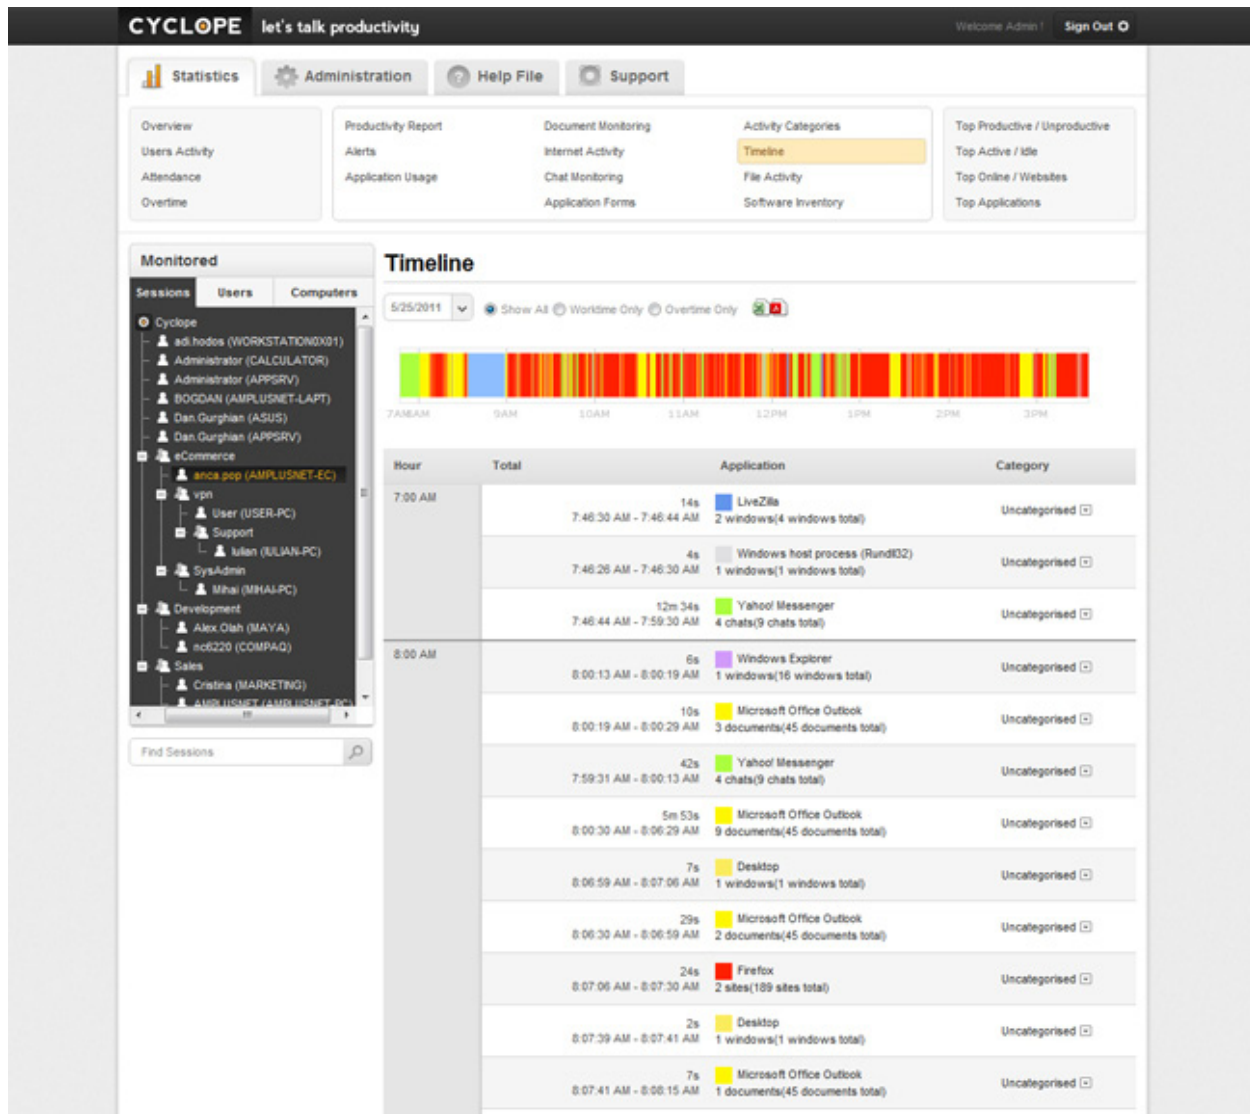

*NOTE: UNDER EACH APPLICATION NAME THERE IS INCLUDED A LINK WITH THE NUMBER OF WINDOWS USED WITHIN THE MONITORED APPLICATION DURING THAT PARTICULAR TIME PERIOD. WHEN CLICKING THE LINK, IT EXPANDS SHOWING THE DETAILED IMAGE OF THE WINDOWS USAGE. THERE IS ALSO SPECIFIED, IN BRACKETS, THE TOTAL NUMBER OF WINDOWS.*

*NOTE: BY CLICKING THE NAME OF ONE OF THE LISTED APPLICATION THE ENTIRE VIEW WILL BE FILTERED ACCORDING TO THE CLICKED APPLICATION.*

- ü Category - A dropdown selection where the user can assign to an application one of the defined categories. The default value is **Uncategorized**.

*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*

Img. 46, Timeline page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday*) as well as the possibility to select a Specific Date, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.14 File Activity

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Data Table** containing the following information displayed on columns:
  - ü Name - The username used by the employee on the monitored station.
  - ü Date - The date of the monitored day.
  - ü Operation - The recorded operation that was performed on the recorded file.
  - ü Type - The type of drive on which the file is located.
  - ü Path - The full path of the recorded file.

The screenshot shows the CYCLOPE File Activity page. The sidebar on the left has a 'Monitored' section with tabs for Sessions, Users, and Computers. The main content area is titled 'File Activity' and shows a table of file operations for the date 05/20/2011. The table has columns for Name, Date, Operation, Type, and Path. The operations listed include file creation, deletion, and modification of system files and user documents.

Name	Date	Operation	Type	Path
anca.pop	20/05/11 13:36	Create	fixed	C:\config.msi14146e3.rbs
anca.pop	20/05/11 13:35	Create	fixed	C:\config.msi
anca.pop	20/05/11 13:35	Create	fixed	C:\config.msi14146d9.rbs
anca.pop	20/05/11 13:35	Delete	fixed	C:\config.msi
anca.pop	20/05/11 13:34	Delete	fixed	C:\users\anca.pop\desktop\downloads\quicktimeinstaller.exe
anca.pop	20/05/11 13:34	Modify / ReName	fixed	C:\users\anca.pop\desktop\downloads\quicktimeinstaller.exe.part
anca.pop	20/05/11 13:34	Modify / ReName	fixed	C:\users\anca.pop\desktop\downloads\quicktimeinstaller.exe
anca.pop	20/05/11 13:34	Create	fixed	C:\users\anca.pop\desktop\downloads\quicktimeinstaller.exe.part
anca.pop	20/05/11 13:34	Create	fixed	C:\users\anca.pop\desktop\downloads\quicktimeinstaller.exe

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All*, *Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.15 Software Inventory

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.

#### 3.15.1 Inventory

- **Data Table** containing the following information displayed on columns:
  - ü Software - The name of the recorded software application.
  - ü User - The username used by the employee on the monitored station.
  - ü Computer - The name of the monitored computer.
  - ü Date - The date when the software application was recorded in the Cyclope database.
  - ü Details - An expandable link; when clicked reveals the version of the software application and the full path for its executable file.

#### 3.15.2 Updates

A **data table** with the same information as for the previous tab, containing all the software applications that were updated since their registration in the database. The user can check on this tab when was the last update for all the registered software applications.

The screenshot displays the CYCLOPE Software Inventory page. The sidebar on the left contains navigation links: Overview, Users Activity, Attendance, Overtime, Productivity Report, Alerts, Application Usage, Document Monitoring, Internet Activity, Chat Monitoring, Application Forms, Activity Categories, Timeline, File Activity, and Software Inventory (highlighted). The main content area is titled 'Software Inventory' and features a 'Monitored' section on the left with a tree view of users and computers. The 'Software Inventory' table lists various applications installed on the computer 'anica.pop' (AMPLUSNET-EC (192.168.1.105)). The table includes columns for Software, User, Computer, and Date. The 'Updates' tab is selected, showing a list of software updates with details like version and path.

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

*NOTE: THE DATETIME PICKER AND THE RADIO BUTTON LIST FILTER ARE ONLY INCLUDED ON THE UPDATES TAB. THE INVENTORY TAB HOLDS INFORMATION FROM THE CYCLOPE INSTALLATION DATE TO THE PRESENT DATE.*

*THE ADMINISTRATOR HAS THE PERMISSION TO VIEW ALL STATISTICS. THE MANAGER CAN VIEW ONLY THE STATISTICS BELONGING TO THE EMPLOYEES WHO ARE INCLUDED IN THE DEPARTMENT ASSIGNED TO THE RESPECTIVE MANAGER. THE EMPLOYEE HAS THE PERMISSION TO VIEW ONE EMPLOYEE'S STATISTICS ONLY (USUALLY HIS OWN).*

This page can be exported in **CSV** and **PDF** formats by clicking the corresponding icon located right under the page title and near the time filters.

### 3.16 Top Productive / Unproductive

**Information sections included in this page:**

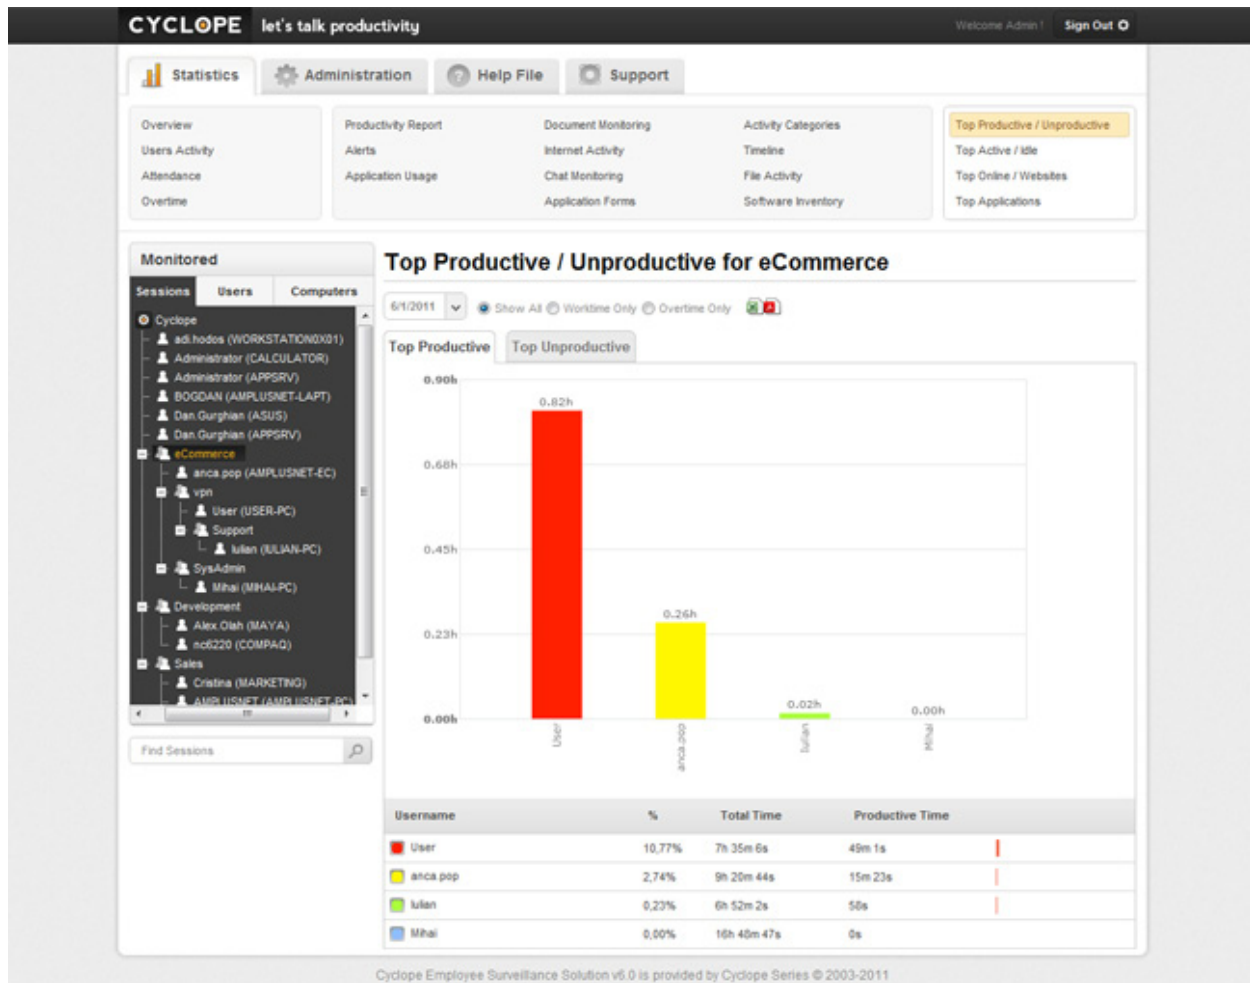

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.

#### 3.16.1 Top Productive

- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü % - The percent of productive time relative to the total recorded time.
  - ü Total Time - The total time recorded for the selected time period.
  - ü Productive Time - The time spent by the employee using productive applications.
  - ü Graphic bar - Colored bar corresponding to the percentage of productive time.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a bar chart and presents the top 15 employees in descending order of their recorded productive time.

#### 3.16.2 Top Unproductive

- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü % - The percent of unproductive time relative to the total recorded time.
  - ü Total Time - The total time recorded for the selected time period.
  - ü Unproductive Time - The time spent by the employee using unproductive applications.
  - ü Graphic bar - Colored bar corresponding to the percentage of unproductive time.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a bar chart and presents the top 15 employees in descending order of their recorded unproductive time.

### 3.17 Top Active / Idle

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.

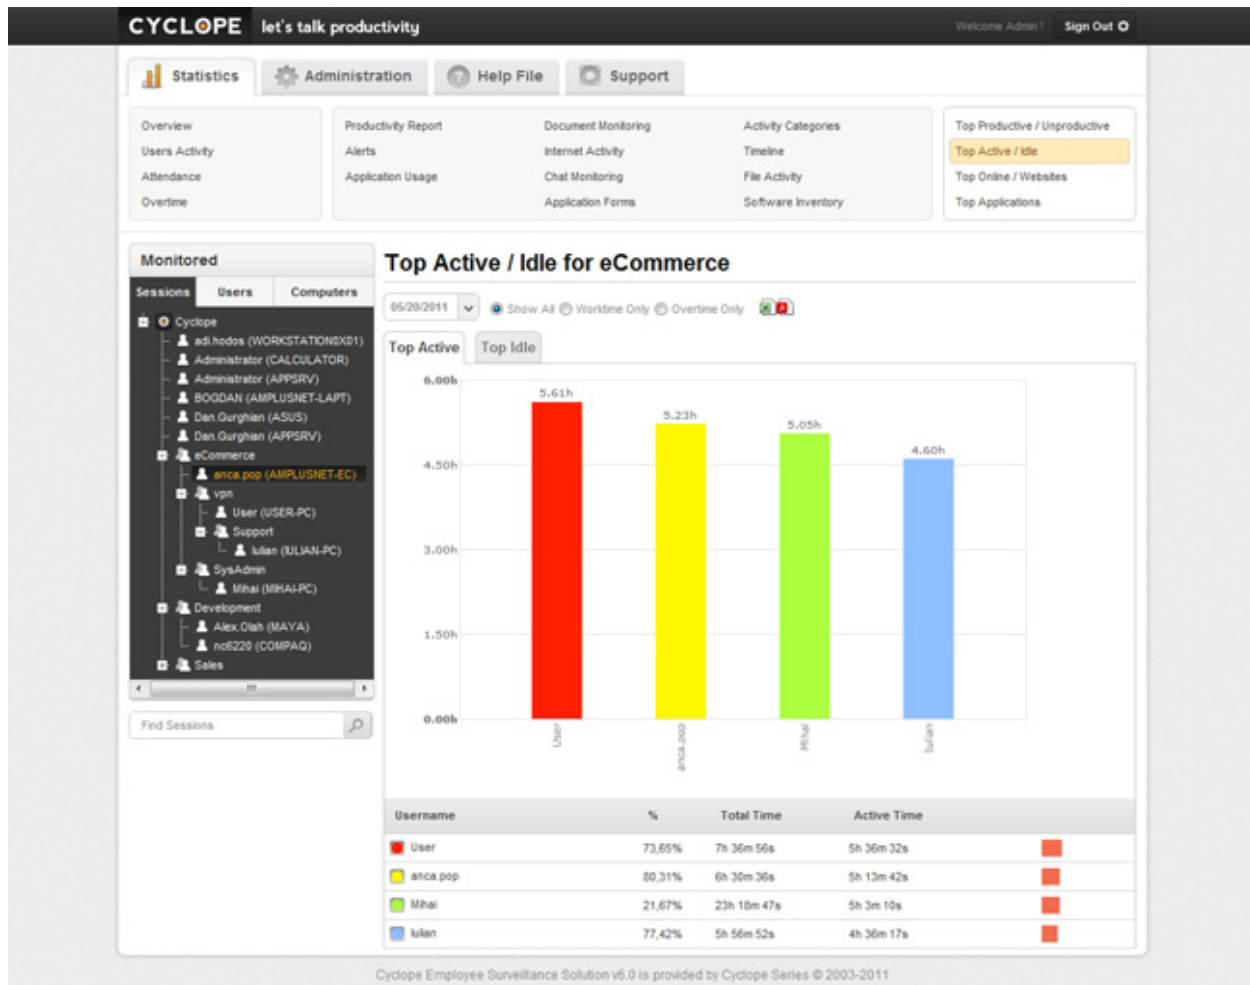

#### 3.17.1 Top Active

- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü % - The percent of active time relative to the total recorded time.
  - ü Total Time - The total time recorded for the selected time period.
  - ü Active Time - The recorded time when the employee was active.
  - ü Graphic bar - Colored bar corresponding to the percentage of active time.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a bar chart and presents the top 15 employees in descending order of their recorded active time.

#### 3.17.2 Top Idle

- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü % - The percent of idle time relative to the total recorded time.
  - ü Total Time - The total time recorded for the selected time period.
  - ü Idle Time - The recorded time when the employee was idle.
  - ü Graphic bar - Colored bar corresponding to the percentage of idle time.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a bar chart and presents the top 15 employees in descending order of their recorded idle time.

Img. 50, Top Active / Idle page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. If the working schedule has not been modified, the default working schedule will be considered.

## 3.18 Top Online / Websites

### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.

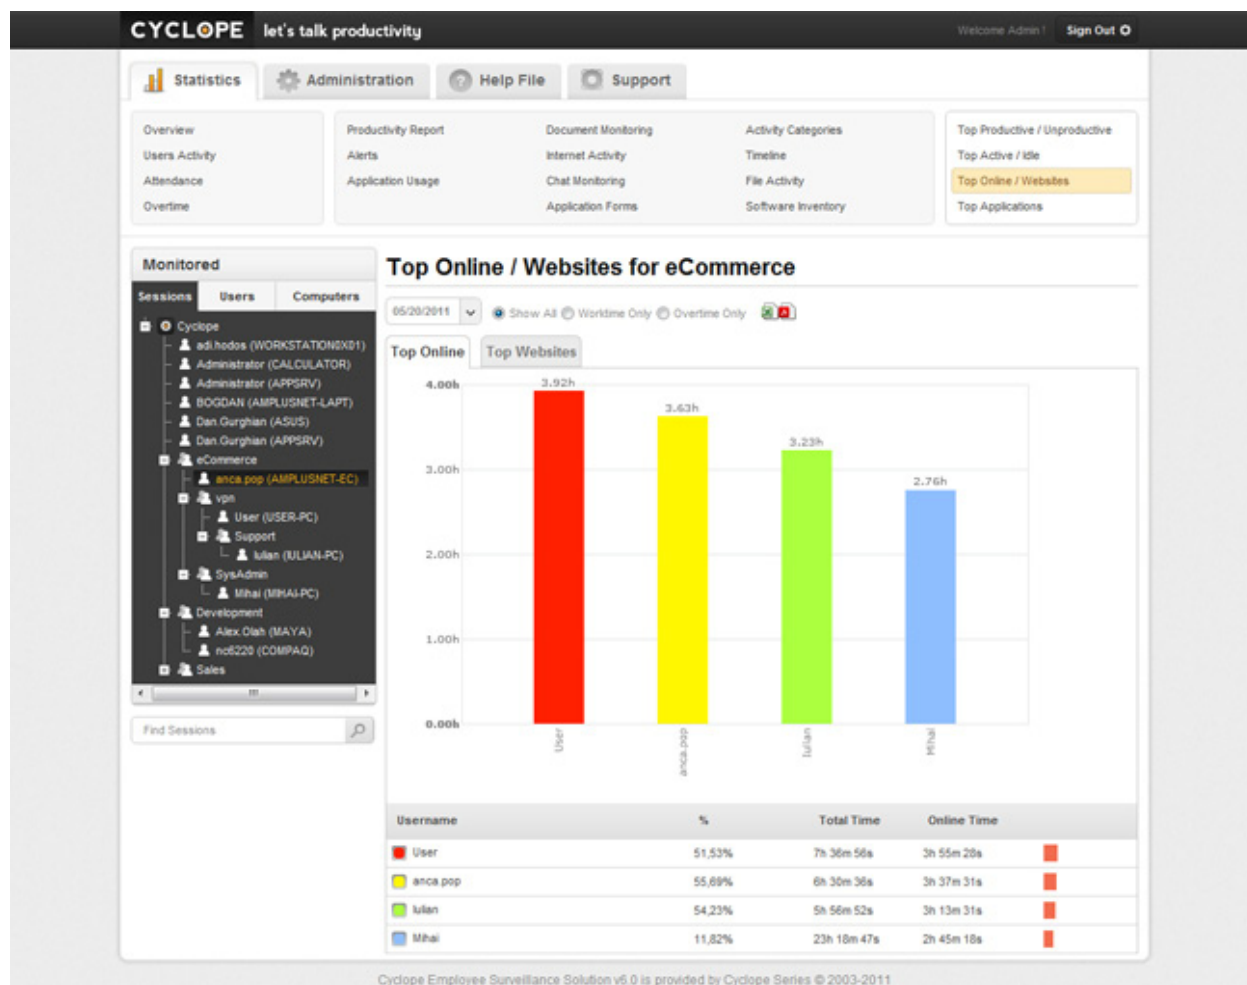

#### 3.18.1 Top Online

- **Data Table** containing the following information displayed on columns:
  - ü Username - The name used by the employee on the monitored station.
  - ü % - The percent of time spent by the employee online relative to the total recorded time.
  - ü Total Time - The total time recorded for the selected time period.
  - ü Online Time - The recorded time when the employee was active online.
  - ü Graphic bar - Colored bar corresponding to the percentage of online time.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a bar chart and presents the top 15 employees in descending order of their recorded online time.

#### 3.18.2 Top Websites

- **Data Table** containing the following information displayed on columns:
  - ü www - The list of visited web domains.
  - ü User - The username used by the employee on the monitored station.
  - ü % - The percent of time spent by the employee on the recorded web domains relative to the total recorded time.
  - ü Time - The recorded time spent by the employee on the recorded web domains.
  - ü Graphic bar - Colored bar corresponding to the time spent by the employee on the recorded web domains.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a pie chart and presents the top 15 most visited web domains in descending order of their recorded access time.

Img. 51, Top Online / Websites page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule. ### 3.19 Top Applications

#### Information sections included in this page:

- **Tree View** containing monitored **Sessions**, **Users** and **Computers**, organized on separate tabs.
- **Data Table** containing the following information displayed on columns:
  - ü Application - The name of the recorded application.
  - ü Category - A dropdown selection where the user can assign to an application one of the defined categories. The default value is **Uncategorized**.  
*NOTE: CHANGES FOR THIS OPTION ARE ALLOWED ON DEPARTMENT LEVEL ONLY.*
  - ü User - The username used by the employee on the monitored station.  
*NOTE: IF THE SELECTED TREE VIEW ITEM IS A DEPARTMENT, THIS COLUMN WILL LIST ALL THE USERS FROM THAT DEPARTMENT WHO HAVE USED THE RECORDED APPLICATION.*
  - ü % - The percent of application usage time.
  - ü Time - Usage time for the recorded application.
- **Graphic chart** illustrating the data presented in the data table. This chart appears as a bar chart and presents the top 15 applications in descending order of their usage time.

Img. 52, Top Applications page

The **Datetime picker** offers a few predefined time frame options (*Today, Yesterday, This Week, Last Week, This Month and Last Month*) as well as the possibility to select a Specific Date or Date Range, and all these can be combined with an option that applies an hourly filter on the desired time selection.

A radio button list filter with the following options: *Show All, Worktime Only* and *Overtime Only*, allows the user to quickly apply on the returned data a time filter corresponding to the defined working schedule.
